Personal Skills & : Ability to quickly grasp technical aspects and willingness to learn & High priority levels & Result oriented. Education Details January 2018 Master of Engineering Computer Technology & Application Technology, Madhya Pradesh Triba Institute of Engineering and Information Technology January 2018 B.E. computer science Madhya Pradesh RKDF Institute of Science and Technology College of Engineering January 2005 Polytechnic Information Technology Vidisha, Madhya Pradesh SATI Engineering College in Vidisha January 2003 M tech Thesis Detail BMCH School in Ganj basoda Data science	I have six month experience in Data Science. Key Skills:- Experience in Machine Learning, Deep Leaning, NLP, Python, SQL, Web Scraping Good knowledge in computer subjects and ability to update Skill Details Experience in Machine Learning, Deep Learning, NLP, Python, SQL, Web Crawling, HTML,CSS - Exprience - Less than 1 year month'sCompany Details company - RNTAI Technology Solution description - Text classification using Machine learning Algorithms with python. Practical knowledge of Deep learning algorithms such as A Recurrent Neural Networks(RNN). Develop custom data models and algorithms to apply to dataset Experience with Python packages like Pandas, Scikit-learn, Tensor Flow, Numpy, Matplotlib, NLTK. Comfort with SQL, A MYSQL. Sentiment analysis. A Apply leave Dataset using classification technique like TF-idf, LSA with cosine similarity using Machine learning Algorithms. Web crawling using Selenium web driver and Beautiful Soup with python. company - Life Insurance Corporation of India Bhopal description - A/A Explaining policy features and the benefits A/A Updated knowledge of life insurance products and shared with customers		
	Expertise & Data and Quantitative Analysis & Decision Analytics & Predictive Modeling & Data-Driven Personalization & KPI Dashboards & Big Data Queries and Interpretation & Data Mining and Visualization Tools & Machine Learning Algorithms & Business Intelligence (BI) & Research, Reports and Forecasts Education Details PGP in Data Science, Mumbai, Maharashtra Aegis School of data science & Business B.E. in Electronics & Communication Electronics & Communication Indore, Madhya Pradesh IES IPS Academy Data Scientist		
Data Science	Data Scientist with PR Canada Skill Details Algorithms- Experience - 6 months BI- Experience - 6 months Business Intelligence- Experience - 6 months Machine Learning- Experience - 24 months Visualization- Experience - 24 months spark- Experience - 24 months python- Experience - 36 months tableau- Experience - 36 months Data Analysis- Experience - 24 monthsCompany Details company - Aegis school of Data Science & Business description - Mostly working on industry project for providing solution along with Teaching Appointments: Teach undergraduate and graduate-level courses in Spark and Machine Learning as an adjunct faculty member at Aegis School of Data Science, Mumbai (2017 to Present) company - Aegis school of Data & Business description - Data Science Intern, Nov 2015 to Jan 2016		
	Furnish executive leadership team with insights, analytics, reports and recommendations enabling effective strategic planning across all business units, distribution channels and product lines. & Chat Bot using AWS LEX and Tensor flow Python The goal of project creates a chat bot for an academic institution or university to handle queries related courses offered by that institute. The objective of this task is to reduce human efforts as well as reduce man made errors. Even by this companies handle their client 24x7. In this case companies are academic institutions and clients are participants or students. & Web scraping using Selenium web driver Python The task is to scrap the data from the online messaging portal in a text format and have to find the pattern form it. & Data Visualization and Data insights Hadoop Eco System, Hive, PySpark, QlikSense The goal of this project is to build a Business Solutions to a Internet Service Provider Company, like handing data which is generated per day basis, for that we have to visualize that data and find the usage pattern form it and have a generate a reports. & Image Based Fraud Detection Microsoft Face API, PySpark, Open CV The main goal of project is to build a given Database images, Face recognition is the recognizing a special face from set of different faces. Face is extracted and then compared with the database Image if that Image recognized then the person already applied for loan from somewhere else and now hiding his or her identity, this is how we are going to prevent the frauds in the initial stage itself. & Churn Analysis for Internet Service Provider R, Python, Machine Learning, Hadoop The objective is to identify the customer who is likely to churn in a given period of time; we have to pretend the customer giving incentive offers. & Sentiment Analysis Python, NLP, Apache Spark service in IBM Bluemix This project is highly emphasis on tweets from Twitter data were taken for mobile networks service provider to do a sentiment analysis and analyze whether the expressed opinion was positive, negative or neutral, capture the emotions of the tweets and comparative analysis.		
Data Science	Quantifiable Results: & Mentored 7-12 Data Science Enthusiast each year that have all since gone to graduate school in Data Science and Business Analytics. & Reviewed and evaluated 20-40 Research Papers on Data Science for one of the largest Data Science Conference called Data Science Congress by Aegis School of Business Mumbai. & Heading a solution providing organization called Data Science Delivered Data Science Mumbai and managed 4-5 live projects using Data Science techniques. & Working for some social cause with the help of Data Science for Social Goods Committee, where our team developed a product called "Let's find a missing Child" for helping society. & IBM India Pvt ltd description - Mostly worked on blumix and IBM Watson for Data science.		
	Skills * Programming Languages: Python (pandas, numpy, scipy, scikit-learn, matplotlib), Sql, Java, JavaScript/JQuery, * Machine learning: Regression, SVM, NaA've Bayes, KNN, Random Forest, Decision Trees, Boosting techniques, Cluster Analysis, Word Embedding, Sentiment Analysis, Natural Language processing, Dimensionality reduction, Topic Modelling (LDA, NMF), PCA & Neural Nets. * Database Visualizations: Mysql, SqlServer Data Science Assurance Associate Data Science Assurance Associate - Ernst & Young LLP Skill Details JAVASCRIPT- Experience - 24 months Query- Experience - 24 months Python- Experience - 24 monthsCompany Details company - Ernst & Young LLP description - Fraud Investigations and Dispute Services Assurance TECHNOLOGY ASSISTED REVIEW TAR (Technology Assisted Review) assists in accelerating the review process and run analytics and generate reports. * Core member of a team helped in developing automated review platform tool from scratch for assisting E-discovery domain, this tool implements predictive coding and topic modelling by automating reviews, resulting in reduced labor costs and time spent during the lawyers review. * Understand the end to end flow of the solution, doing research and development for classification models, predictive analysis and mining of the information present in text data. Worked on analyzing the outputs and precision monitoring for the entire tool. * TAR assists in predictive coding, topic modelling from the evidence by following EY standards. Developed the classifier models in order to identify "red flags" and fraud-related issues. Tools & Technologies: Python, scikit-learn, tfidf, word2vec, doc2vec, cosine similarity, NaA've Bayes, LDA, NMF for topic modelling, Vader and text blob for sentiment analysis, Matplotlib lib, Tableau dashboard for reporting. MULTIPLE DATA SCIENCE AND ANALYTIC PROJECTS (USA CLIENTS) TEXT ANALYTICS - MOTOR VEHICLE CUSTOMER REVIEW DATA * Received customer feedback survey data for past one year. Performed sentiment (Positive, Negative & Neutral) and time series analysis on customer comments across all 4 categories. * Created heat map of terms by survey category based on frequency of words * Extracted Positive and Negative words across all the Survey categories and plotted Word cloud. * Created customized tableau dashboards for effective reporting and visualizations. CHATBOT * Developed a user friendly chatbot for one of our Products which handle simple questions about hours of operation, reservation options and so on. * This chat bot serves entire product related questions. Giving overview of tool via QA platform and also give recommendation responses so that user question to build chain of relevant answer. * This too has intelligence to build the pipeline of questions as per user requirement and asks the relevant recommended questions. Tools & Technologies: Python, Natural language processing, NLTK, spacy, topic modelling, Sentiment analysis, Word Embedding, scikit-learn, JavaScript/JQuery, SqlServer		
Data Science	INFORMATION GOVERNANCE Organizations to make informed decisions about all of the information they store. The integrated Information Governance portfolio synthesizes intelligence across unstructured data sources and facilitates action to ensure organizations are best positioned to counter information risk. * Scan data from multiple sources of formats and parse different file formats, extract Meta data information, push results for indexing elastic search and created customized, interactive dashboards using kibana. * Performing ROT Analysis on the data which give information of data which helps identify content that is either Redundant, Outdated, or Trivial. * Performing full-text search analysis on elastic search with predefined methods which can tag as (PII) personally identifiable information (social security numbers, addresses, names, etc.) which frequently targeted during cyber-attacks. Tools & Technologies: Python, Flask, Elastic Search, Kibana FRAUD ANALYTIC PLATFORM Fraud Analytics and investigative platform to review all red flag cases. & FAP is a Fraud Analytics and investigative platform with inbuilt case manager and suite of Analytics for various ERP systems. * It can be used by clients to interrogate their Accounting systems for identifying the anomalies which can be indicators of fraud by running advanced analytics Tools & Technologies: HTML, JavaScript, SqlServer, JQuery, CSS, Bootstrap, Node.js, D3.js

Education Details B.C.A Bachelor Computer Application Pune, Maharashtra Pune University H.S.C. Pune, Maharashtra Pune University S.S.C. Pune, Maharashtra Pune University Web Designing and Developer php Developer - Exposys Pvt. Ltd Skill Details Company Details company - Exposys Pvt. Ltd description - Technical Skills Web Development: HTML5, CSS3, Bootstrap, PHP, Ajax, JQuery, JavaScript. Database: MySQL. Development Tools: Notepad++, Sublime Text2. Framework: Codeigniter. Server: Apache Tomcat, Xampp Control Panel. Operating Systems: Windows. company - Exposys Pvt. Ltd description - Pune August 2017 to till date Project Details: Project-I: Pragat Bharat System Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: This project aim is specially design for people. It is used to collect information to diflernt sector. Project-II: Go Ayur System Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX. Database Used: My SQL. Team size: 2 Position: Software Developer Synopsis: Go Ayurveda Panchakarma center is one of most traditionally well established, professional and innovative providers of Classical Ayurvedic Health services and Kerala Panchakarma therapies. Project-III: Vitanindia System Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 2 Position: Software Developer Synopsis: Online Shoopng through app. This app is user friendly because there is a option for change language. User can to find different categories products as there choice. Project-IV: MahabaleshwarTours Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: In this system is to provide Online Registration, Tour Package Information, Ticket Booking, Online Payment and Searching Facility for Customer and also Generate Different types of Report. Project-V: Cityspaceindia Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Service provider website we provide different categories. Project-VI: Fruitsbuddy Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Fruitsbuddy is to manage the details of fruits, Customer, Order, Transaction, Payment. It manages all the information about fruits, Stocks, Payment. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the fruits, Customer, Stocks, Order. Project-VII: Totalclee Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Real Estate web application has been created for helping you to sell properties through web based user interface. Visitors on your website can view particular desired products using search engine facility. Project-VIII: Golchha Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Service provider website we provide different categories.

	Education Details B.C.A Bachelor Computer Application Pune, Maharashtra Pune University H.S.C. Pune, Maharashtra Pune University S.S.C. Pune, Maharashtra Pune University Web Designing and Developer php Developer - Exposys Pvt. Ltd Skill Details Company Details company - Exposys Pvt. Ltd description - Technical Skills Web Development: HTML5, CSS3, Bootstrap, PHP, Ajax, JQuery, JavaScript. Database: MySQL. Development Tools: Notepad++, Sublime Text2. Framework: Codeigniter. Server: Apache Tomcat, Xampp Control Panel. Operating Systems: Windows. company - Exposys Pvt. Ltd description - Pune August 2017 to till date Project Details: Project-I: Pragat Bharat System Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: This project aim is specially design for people. It is used to collect information to diflernt sector. Project-II: Go Ayur System Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX. Database Used: My SQL. Team size: 2 Position: Software Developer Synopsis: Go Ayurveda Panchakarma center is one of most traditionally well established, professional and innovative providers of Classical Ayurvedic Health services and Kerala Panchakarma therapies. Project-III: Vitanindia System Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 2 Position: Software Developer Synopsis: Online Shoooping through app. This app is user friendly because there is a option for change language. User can to find different categories products as there choice. Project-IV: MahabaleshwarTours Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: In this system is to provide Online Registration, Tour Package Information, Ticket Booking, Online Payment and Searching Facility for Customer and also Generate Different types of Report. Project-V: Cityspaceindia Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Service provider website we provide different categories. Project-VI: Fruitsbuddy Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Fruitsbuddy is to manage the details of fruits, Customer, Order, Transaction, Payment. It manages all the information about fruits, Stocks, Payment. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the fruits, Customer, Stocks, Order. Project-VII: Totalclee Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Real Estate web application has been created for helping you to sell properties through web based user interface. Visitors on your website can view particular desired products using search engine facility. Project-VIII: Golchha Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Service provider website we provide different categories.

Ltd description - Pune August 2017 to till date Project Details: Project-I: Pragat Bharat System Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: This project aim is specially design for people. It is used to collect information to diflernt sector. Project-II: Go Ayur System Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX. Database Used: My SQL. Team size: 2 Position: Software Developer Synopsis: Go Ayurveda Panchakarma center is one of most traditionally well established, professional and innovative providers of Classical Ayurvedic Health services and Kerala Panchakarma therapies. Project-III: Vitanindia System Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 2 Position: Software Developer Synopsis: Online Shoooping through app. This app is user friendly because there is a option for change language. User can to find different categories products as there choice. Project-IV: MahabaleshwarTours Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: In this system is to provide Online Registration, Tour Package Information, Ticket Booking, Online Payment and Searching Facility for Customer and also Generate Different types of Report. Project-V: Cityspaceindia Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Service provider website we provide different categories. Project-VI: Fruitsbuddy Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Fruitsbuddy is to manage the details of fruits, Customer, Order, Transaction, Payment. It manages all the information about fruits, Stocks, Payment. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the fruits, Customer, Stocks, Order. Project-VII: Totalclee Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Real Estate web application has been created for helping you to sell properties through web based user interface. Visitors on your website can view particular desired products using search engine facility. Project-VIII: Golchha Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Service provider website we provide different categories. Web Designing

	Education Details B.C.A Bachelor Computer Application Pune, Maharashtra Pune University H.S.C. Pune, Maharashtra Pune University S.S.C. Pune, Maharashtra Pune University Web Designing and Developer php Developer - Exposys Pvt. Ltd Skill Details Company Details company - Exposys Pvt. Ltd description - Technical Skills Web Development: HTML5, CSS3, Bootstrap, PHP, Ajax, JQuery, JavaScript. Database: MySQL. Development Tools: Notepad++, Sublime Text2. Framework: Codeigniter. Server: Apache Iomcat, Xampp Control Panel. Operating Systems: Windows. company - Exposys Pvt. Ltd description - Pune August 2017 to till date Project Details: Project-I: Pragat Bharat System Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: This project aim is specially design for people. It is used to collect information to diflernt sector. Project-II: Go Ayur System Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX. Database Used: My SQL. Team size: 2 Position: Software Developer Synopsis: Go Ayurveda Panchakarma center is one of most traditionally well established, professional and innovative providers of Classical Ayurvedic Health services and Kerala Panchakarma therapies. Project-III: Vitanindia System Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 2 Position: Software Developer Synopsis: Online Shoooping through app. This app is user friendly because there is a option for change language. User can to find different categories products as there choice. Project-IV: MahabaleshwarTours Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: In this system is to provide Online Registration, Tour Package Information, Ticket Booking, Online Payment and Searching Facility for Customer and also Generate Different types of Report. Project-V: Cityspaceindia Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Service provider website we provide different categories. Project-VI: Fruitsbuddy Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Fruitsbuddy is to manage the details of fruits, Customer, Order, Transaction, Payment. It manages all the information about fruits, Stocks, Payment. The project is totally built at administrative end and thus only the administrator is guaranteed the access. The purpose of the project is to build an application program to reduce the manual work for managing the fruits, Customer, Stocks, Order. Project-VII: Totalclee Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Real Estate web application has been created for helping you to sell properties through web based user interface. Visitors on your website can view particular desired products using search engine facility. Project-VIII: Golchha Technologies Used: HTML, CSS, BOOTSTRAP, PHP, JQUERY, AJAX, JAVA SCRIPT. Database Used: My SQL. Team size: 1 Position: Software Developer Synopsis: Service provider website we provide different categories.

Participate in the customer negotiation process, including commercial and technical negotiations. â Follow up of quotations to close the order also Follow up for payment collection. â Perform PO reviews to ensure that all critical elements are correct and take up to Senior Top managements and customer in case of any discrepancies, and get PO amendment if required. â Create the order transfer file for submission to the factory in accordance with P.O. Support factory for any post order activities & after sales service where necessary to develop and maintain good customer service. Role & Responsibilities:- Proposal/Estimation Engineering & Products Costing â Review and receive the RFQs for company products and solutions. â Estimation of Pneumatic Automation Products & Projects, valves, linear & rotary actuator and field equipment, Piping, Fabricated equipment's etc. â Plotting enquiries to vendors for critical bought out items. â Continuous follow up with vendors for quotations. â Applying thumb rule or standard practice of design while estimating for achieving accuracy with less time. â Analyzing & evaluating estimated cost and actual cost of the jobs already manufactured in past to arrive at a realistic cost estimates. â Maintaining databanks of all quotations for readily available to others also. Coordinating with Instrumentation & electrical dept. for costing. â Handling estimation department while submitting offers on time. Visit to site for site projects, if required. Co-ordination with Purchase and process departments. Attending Customer Enquiries meeting. Development of vendors. â Preparation of statement enquiries pending for estimation/ under progress â Understand the client's concern / pain area / requirement. Offer most suitable & optimized the tailor made or predesigned Chemtronics solution with techno-commercial proposal which should be technically feasible & commercially viable. â Assign work to Jr. Proposal executives/Engineers â Guide & Coordinate with design, CAD, sales, marketing, project & commercial department. Role & Responsibilities:- Engg. Procurement & Purchase, Vendor Development & Supply Chain. â Procurement of Steel/Raw Material & semi-finish Products Based on Projects requirement. â Continuous improvement in negotiation process & Cost saving opportunities. â Turn round time improvement & new vendor development Contract Management & Tenders. â To achieve target savings against budget and/or last purchase rates & develop new vendors, & Obtaining quotation and finalization. â Research and evaluate potential vendors and suppliers, Request quotes and do technical comparisons of Prices, also maintain good relationships with vendors and suppliers. â Examine and review products and supplies to ensure quality & digitize procurement processes. â Track incoming & future purchases plans, Projects inventory, delivery arrival time, and note actual arrival time Organize and update database of suppliers, delivery times, invoices, and quantity of supplies. â Collaborate with financial team members on contracts, invoicing, and other financial matters â Finding out the suppliers for buying various materials from products finders as well as from internet Source. â Create RFQ for materials for projects, departments, for project materials, equipment's and services. â Review Vendor evaluation & Vendor registration from Supply time & quality of products. company - Proposal & Estimation description - M/s Duncan Engineering Ltd, Pune, Ranjangaon MIDC Role & Responsibilities:- â Project execution, Vendor development, supply chain Management, interacting with Vendors to ensure timely action of order & negotiating with the vendor. â Work directly with customer to understand their process and develop the best solution For their requirement, lead proposal engineering team & technical support to customer. â Work with sales team to professionally represent the company at a customer, gather Data and ask the right question to define a project. â Work with our engineers and designer to develop and quote cost effective solution. Cost estimation, preparing proposal & quotation base on Technical specification of Customer requirement & identify production process and machines/brought out Item requirements, & co-ordinate with customer to understand exact requirements. â Identification of critical problem & work out Proper solution in specified time frames â Production design-new manufacturing process - new product development. Developing Customized manufacturing solutions. (Steel, Power & Cement, petrochemical sector.) â Executing cost saving technique/ measures and modifications to achieve Substantial Reduction in O & M expenditures and work within the budget Maintaining fruitful Relationships with existing customers. company - Rotex Engineers & Manufacturing Pvt. Ltd description - Nov 2015 - June 2016 Rotex Engineers & Manufacturing Pvt. Ltd Dombivli MIDC, Kaylan. Role & Responsibilities:- â To Manage & enhance the activity related to proposal of pneumatics/fabrication projects & products. â Project execution, Vendor development, supply chain Management, interacting with vendors to ensure Timely action of order & Negotiating with the vendor. â Production design-new manufacturing process - new product development. Developing Customized manufacturing solutions. (Steel, Power & Cement petrochemical sector.) â Preparation of technical data sheets as per tender specification. â Calculate price structure and analyze cost proposals â Monitoring progress throughout the job & comparing it with the schedule of work. â Maintaining fruitful relationships with existing customers â Review Vendor evaluation & Vendor registration from Supply time & quality of products. â Examine and review products and supplies to ensure quality. company - Design & Proposal Engineering description - M/s Schrader Duncan Ltd, Pune, Ranjangaon MIDC Role & Responsibilities:- â Project execution, Vendor development, supply chain Management, interacting with Vendors to ensure timely action of order & negotiating with the vendor. â Design or modify Mechanical assemblies, hydraulic/pneumatic assemblies, Fabricated assay Along with layouts/schematics and/or detailed drawings as per specification. â Generate electrical or mechanical product specifications, standard operating procedures, maintenance manuals & Doing basic mechanical design, if required. â Participate in growth & developing innovative solutions with design & development, sales & marketing team. â Define, coordinate, perform and generate engineering test reports & engineering analysis. â In Co-Ordination with production manager implement and assure that all manufacturing processes are being followed according to process Flow in relevant Departments. â Maintain records of Non-Conformity (NC) raised during internal audits and close the same with corrective actions. â Maintain records of obsolete documents and remain in touch with all HODs. â Maintain ISO documents pertaining to ISO9001:2015 and bring awareness among employees â Coordinate & communicate with channel partners, O.E.M.s, dealers, consultants & end customers for Design & offer technically feasible. â Carry Out internal audit as per audit plan and schedule, maintain the record of controlled drawings. company - Fabrication Field-Hoist, Goods Lifts description - JOIST- O- MECH Engg. It also managescustomer complaint and resolution system implementation along with automated MIS on monthly basis S Responsibilities: â Participate in requirement gathering discussion with client to understand the flow of business processes â Analyze the requirements and determine the core processes, develop Process Documentation and ensure to stay up-to-date in conjunction with on-going changes â Participate in process flow analysis and preparing BRD, SRS. â Coordinating with developers, designers & operations teams for various nuances of the project, communicate the stakeholder requirements from requirement/enhancement to implementation and finally deliver the same within estimated timeframe. â Support UAT by reviewing test cases, manage version control of documents, software builds. â Coordinate with the stakeholders for UAT sign off and coordinate internally for production movement till Go-live stage of the application. â Provide demo and training to internal and end user using PowerPoint presentation. â Resolving project functional & technical issues during UAT. â Prioritizing the Production bugs and resolving the same within the estimated timeframe. â Preparing Project Status Report and Production Bugs Status to all the stakeholders. â Promoting and Networking for online trading platform. â Designing query sheet for obtaining and comparison of quotes from various vendors. â Development of product codes / material codes for inventory management (Master Data Management) company - CAPGEMINI Head Office description - Type: Mobile and Device Testing. Duration: January 2014 - August 2014 Follet - An application which takes an electronic request from the user for the books he requires from a particular follet store. This detailed information about books that will include the name of the book, its price, the date of the transaction and the parties involved which will then be sent to follet stores. User then create request for one or more books for a given date. This request is then processed further and user gets a mail of the date wh Responsibilities: â Understanding the needs and business requirements. â Preparing BRD, SRS by eliciting all the requirements from the client and SMEs â Understanding the dependency of the modules in the system â Preparation of test plan for Unit level and Integration level. â Preparation and execution of test cases. â Defect tracking, Issue Resolution, Risk Monitoring, Status Tracking, Reporting and Follow-up. â Preparation of Test Completion report. company - CAPGEMINI Head Office description - company - CAPGEMINI Head Office description - Humana is a health care insurance project of U.S. which deals with supplying various medicines to citizens as per the doctor's reference and patient's insurance policy. This application keeps track of all the medicines user has consumed in the past and generates a patient history. A citizen is given a drug only after the doctor's reference so the doctor's information is also linked with the patient's history. Responsibilities: â Understanding the requirements and getting clarifications from client. â Involved in writing test cases based on test scenarios and execute them. â Ensuring Test Coverage using Requirement Traceability Matrix (RTM) â Preparation of Test Completion report. company - CAPGEMINI Head Office description - Testing Trends WQR (World Quality Report) is an application which allows the users to take a survey on different methods and technologies used for testing. Users can choose to answer any type of questions under three different categories. Users have a facility to search, view and export the data to excel. Also, users get daily and weekly reports through email about the new trends in testing implemented around the globe. Th Responsibilities: â Understanding the requirements and getting clarifications from client. â Writing test cases based on test scenarios and executed them. â Performing different types of testing such as Functional, Integration, System, and UAT. Business Analyst â Defect resolution and maintenance of the application.

Education Details										
SAP Technical Architect										
SAP Technical Consultant - (ALE/IDOC/oData/Fiori/S4HANA/EWM/APO/Retail)										
Skill Details										
SAP ABAP- Experience - 120 months										
SAP ABAP (ALE / IDOC / EDI)- Experience - 96 months										
SAP Netweaver Gateway / oData / Fiori- Experience - 24 months										
SAP Techno Functional- Experience - 36 months										
SAP ABAP (IS-Retail / APO / IS-Auto / EWM)- Experience - 36 months										
SAP Techno-Functional- Experience - 48 months										
SAP SD- Experience - 36 months										
NetWeaver Gateway (oDATA, Fiori)- Experience - 24 months										
SAP S/4HANA (new features Extensibility, Embedded Analytics)- Experience - 12 months										
Company Details										
company -										
description - 13+ years of work experience in SAP which includes roles varies from developer to subject matter expert										
a. Strong project experience in implementation, upgrade, application development and maintenance										
a. SAP ABAP Certified associate and has certification in ITIL 2011 Foundation and PRINCE2 practitioner										
a. SAP project Full-Lifecycle implementations across multiple global projects										
a. Direct client exposure of 13 years in United States of America and 12 years in Malaysia										
a. Expertise on SAP ABAP FRICEW components										
a. Experience in various SAP modules like MM, FI, CO, SD, PS, PP, CS, PM, OM and HR										
a. Experience on S/4HANA, IS-Auto, IS-Retail, SCM 7.0, SOLMAN, SAP GTS, SAP PI 7.3, SAP BI 7.0 / 7.3, Vistex, ProSigm, HPQC, IBM ManageNow, CA service desk, Software, Data Matrix										
a. Experience in SAP Netweaver Gateway (Fiori) and also created number of POCs for potential customers										
a. Successfully completed 9 implementation, 7 support, 1 roll-out, and 1 upgrade projects										
a. Expertise in understanding different requirements of the client for diverse industries										
a. Experience in leading technical team of different sizes										
a. Customization experience in various areas of SD, FI & MM modules										
a. Experience in Upgrading to ECC6.0										
a. Experience in Unicode conversion related issues/tasks										
a. Skilled in document processes, identifying issues, handling multiple tasks, and training end users.										
a. Proven ability to interact with business system analysts and end-users in design phase										
a. Extensive experience in analyzing complicated business processes, effort estimations and creating technical specifications.										
a. Experienced with on-site/off-site support model of work and lead the team										
a. Excellent communication skills, team participation, inter-team co-ordination, team leadership abilities and customer oriented attitude										
a. Experience in pre-sales activities										
a. Thorough understanding of the project management and quality processes										
* Excellent grasping power in learning new concepts and technology. * Highly motivated team player with strong work ethics, committed to hard work. * Ability to work and co-ordinate in a team effectively. * Enthusiastic self-starter and team player. * Quick and independent learner.										
Education Details										
January 2014 Bachelor of Technology Information Technology branch BPUT University										
January 2010 Diploma Engineering Brahmapur, Orissa U.C.P Engineering School										
Software Testing & Automation Engineer										
Software Testing & Automation Engineer - Tech Mahindra										
Skill Details										
Company Details										
company - Tech Mahindra										
description - India										
Duration - Oct 2017- Till Date										
Project Description										
BT Group plc (trading as BT and formerly British Telecom) is a British multinational telecommunications holding company with head offices in London, United Kingdom. I worked for Air Logistics Program under the banner of British Telecom. This project handles all the web applications to carry out the whole logistics operation over United Kingdom through various airlines.										
Roles & Responsibilities :										
a. Design and develop framework for the Test scenarios and Test cases.										
a. Developing automation test scripts on the existing application										
a. Executing Test Cases for every new release..										
a. Involved in running test cases and logging defects through the HPQC tool.										
a. Involved in formulating test Summary Report.										
a. Conduct Internal Test Case Peer Reviews.										
a. Participated in Daily Scrum Meetings.										
a. Participated in weekly status meetings with the team, developers to discuss open issues and communicating with onsite team.										
company - Tech Mahindra Pvt. Ltd Pune, Tech Mahindra										
description - is an Indian multinational company with around 115, 000 Employees spread across 90 countries globally.										
Total Experience: 2 Years 7 Months										
Organization										
Designation										
Duration										
company - Tech Mahindra										
description - Project Description										
AT&T Inc. is an American multinational conglomerate holding company headquartered at Whitacre Tower in Downtown Dallas, Texas. During my serving as software engineer at AT&T, I have worked for CSI-CAM (Common Service Interface) team which is responsible for running of AT&T's centralised solution hub web application called myattf.com.										
Roles & Responsibilities :										
a. Design, develop and maintain Automation Test Scripts and Test cases using Selenium WebDriver and several desktop window automating tool such as Sikuli and AutoIt.										
a. Executing Test Cases and check the working functionality of the existing application.										
a. Involved in tracking/monitoring test life cycle and logging defects using JIRA and HPQC/ALM.										
a. Involved in formulating test Summary Report.										
a. Conduct Internal Test Case Peer Reviews.										
a. Participated in Daily Scrum Meetings.										
a. Participated in weekly status meetings with the team, developers to discuss open issues and communicating with onsite team.										
company - Tech Mahindra Pvt. Ltd Pune, Tech Mahindra										
Automation Test description - Till Date										

SOCIAL SKILLS: â - ¶ Ability to establish trust and work with a team. â - ¶ Determined with good work ethics. â - ¶ Ability to work under difficult situations. Education Details January 2011 to January 2016 Mumbai, Maharashtra MUMBAI UNIVERSITY Bachelor of Electronics Engineering Electronics Engineering Mumbai, Maharashtra Atharva College of Engineering at Malad Automation and Electrical engineer Automation and Electrical Engineer - SMEC AUTOMATION PVT. LTD Skill Details Company Details company - SMEC AUTOMATION PVT. LTD description --18. Supply, installation, testing and commissioning of water level sensor and valve actuators for water tanks at BARC hospital Anushaktinagar, Trombay and BARC facility at Kalyan. â - ¶ Implemented of academy projects like Automatically tank filling with relay and float sensor level control, bottle filling on conveyor belt motion, and waste material crashing then separated on conveyor belt motion with PLC controlling. Role of Automation and Instrumentation Engineer (Marine and Industrial Automation): â - ¶ Re-calibration of field instruments like control valve actuators, sensors and transmitters for pneumatic and electrical. â - ¶ Research and developing on new automated system. â - ¶ Level, flow and temperature process control with PID of various brands (Nippon, Selec etc.) â - ¶ PLC panel wiring, DOL and Star delta control wiring of 3 phase induction motor. â - ¶ Panel testing IP knowledge. â - ¶ Control Panel quality check and assurance. â - ¶ Electrical Single Line Diagram (SLD) and power wiring daigram. Internship experience: company - SMEC AUTOMATION PVT. LTD description - Company Profile SMEC Automation provides specialized technical consulting services and custom engineered products to the marine, energy and offshore industries applying advanced methods and technologies. SMEC Automation is one of India's leading manufacturers of automation and monitoring equipment for ocean-going vessels especially in Marine Boiler and Main Engine Control, IGG (Inert Gas Generator) and Alarm System. Project: company - SMEC AUTOMATION PVT. LTD description - Completed Internship of Instrumentation and Calibrations in SMEC Automation Pvt. Ltd. for 6 months duration from 8th June 2016 to 30th November 2016. TECHNICAL QUALIFICATION: â - ¶ Underwent Post Graduate Diploma in Industrial Calibration and Instrumentation and Post Graduate Diploma in Industrial Automation in duration of 3 months each with hands on practical exposure to Industrial Automation Tools like PLC, PAC, SCADA, HMI, INTERFACING, DRIVES, MCC PANEL and VFD. â - ¶ Successful in the examination as Post Graduation Diploma in Industrial Automation and Post Graduation Diploma in Industrial Instrumentation with TUV Rheinland Certified Qualification on 07-11-2016. TECHNICAL SKILLS: â - ¶ Calculation and selection of cable, switchgear and protection. â - ¶ Expertise in PLC Hardware like AB, Schneider, Siemens, Omron, Delta, ABB and GE-Fanuc. Knowledge on control relay logic and ladder logic. â - ¶ Having good knowledge in designing and interfacing PLC with SCADA such as Intouch, Vijeo-Citect, WinCC, iFix and Factory TalkView. Real time data acquisition from OPC (Kepware), HMI & interfacing. â - ¶ Handling VFD for motor control (Schneider-Electric ALTIVAR 28 Series) â - ¶ Calibration of Pressure gauge, Temperature gauge, Control Valve, Level or Flow measurements and control, Druck Injector, Smart DP transmitter using HART COMMUNICATOR. Piping and Instrumentation Diagram, Hand Tools, Tubes and Pipe fitting, Cable and Cable Glandng. â - ¶ Have basic knowledge of "HONEYWELL DCS C-300" and its programming. â - ¶ Completed 5 days Robotic workshop (KUKA KR 16) at Atharva College of Engineering. â - ¶ Training of 2 weeks at RK Electricals. COMPUTER SKILLS: â - ¶ Electrical designing software: basic AutoCAD and EPLAN. â - ¶ PLC Software: Rockwell, Twido suite, Step7-Microwin SP2, Unity Pro XL, CX-Programmer, WPL Software, Codesys and Versa Pro. Designing software: Wonderware, CitectScada7.A, Proficy HMI SCADA/IFIX and FactotyTalk View. â - ¶ Successfully completed Spoken Tutorial program on "C", "C++" and "JAVA" Programming individually conducted by IIT-BOMBAY. â - ¶ Completed 5 days basic course for "Basic Of Mac OS" at Atharva College of Engineering. Completed Ppython Workshop conducted by CodeStrike of 1 day in '15 at Atharva College of Engineering. Automation Testâ - ¶ Operating System: Windows, Mac.

SOCIAL SKILLS: â - ¶ Ability to establish trust and work with a team. â - ¶ Determined with good work ethics. â - ¶ Ability to work under difficult situations. Education Details January 2011 to January 2016 Mumbai, Maharashtra MUMBAI UNIVERSITY Bachelor of Electronics Engineering Electronics Engineering Mumbai, Maharashtra Atharva College of Engineering at Malad Automation and Electrical engineer Automation and Electrical Engineer - SMEC AUTOMATION PVT. LTD Skill Details Company Details company - SMEC AUTOMATION PVT. LTD description --18. Supply, installation, testing and commissioning of water level sensor and valve actuators for water tanks at BARC hospital Anushaktinagar, Trombay and BARC facility at Kalyan. â - ¶ Implemented of academy projects like Automatically tank filling with relay and float sensor level control, bottle filling on conveyor belt motion, and waste material crashing then separated on conveyor belt motion with PLC controlling. Role of Automation and Instrumentation Engineer (Marine and Industrial Automation): â - ¶ Re-calibration of field instruments like control valve actuators, sensors and transmitters for pneumatic and electrical. â - ¶ Research and developing on new automated system. â - ¶ Level, flow and temperature process control with PID of various brands (Nippon, Selec etc.) â - ¶ PLC panel wiring, DOL and Star delta control wiring of 3 phase induction motor. â - ¶ Panel testing IP knowledge. â - ¶ Control Panel quality check and assurance. â - ¶ Electrical Single Line Diagram (SLD) and power wiring daigram. Internship experience: company - SMEC AUTOMATION PVT. LTD description - Company Profile SMEC Automation provides specialized technical consulting services and custom engineered products to the marine, energy and offshore industries applying advanced methods and technologies. SMEC Automation is one of India's leading manufacturers of automation and monitoring equipment for ocean-going vessels especially in Marine Boiler and Main Engine Control, IGG (Inert Gas Generator) and Alarm System. Project: company - SMEC AUTOMATION PVT. LTD description - Completed Internship of Instrumentation and Calibrations in SMEC Automation Pvt. Ltd. for 6 months duration from 8th June 2016 to 30th November 2016. TECHNICAL QUALIFICATION: â - ¶ Underwent Post Graduate Diploma in Industrial Calibration and Instrumentation and Post Graduate Diploma in Industrial Automation in duration of 3 months each with hands on practical exposure to Industrial Automation Tools like PLC, PAC, SCADA, HMI, INTERFACING, DRIVES, MCC PANEL and VFD. â - ¶ Successful in the examination as Post Graduation Diploma in Industrial Automation and Post Graduation Diploma in Industrial Instrumentation with TUV Rheinland Certified Qualification on 07-11-2016. TECHNICAL SKILLS: â - ¶ Calculation and selection of cable, switchgear and protection. â - ¶ Expertise in PLC Hardware like AB, Schneider, Siemens, Omron, Delta, ABB and GE-Fanuc. Knowledge on control relay logic and ladder logic. â - ¶ Having good knowledge in designing and interfacing PLC with SCADA such as Intouch, Vijeo-Citect, WinCC, iFix and Factory TalkView. Real time data acquisition from OPC (Kepware), HMI & interfacing. â - ¶ Handling VFD for motor control (Schneider-Electric ALTIVAR 28 Series) â - ¶ Calibration of Pressure gauge, Temperature gauge, Control Valve, Level or Flow measurements and control, Druck Injector, Smart DP transmitter using HART COMMUNICATOR. Piping and Instrumentation Diagram, Hand Tools, Tubes and Pipe fitting, Cable and Cable Glandng. â - ¶ Have basic knowledge of "HONEYWELL DCS C-300" and its programming. â - ¶ Completed 5 days Robotic workshop (KUKA KR 16) at Atharva College of Engineering. â - ¶ Training of 2 weeks at RK Electricals. COMPUTER SKILLS: â - ¶ Electrical designing software: basic AutoCAD and EPLAN. â - ¶ PLC Software: Rockwell, Twido suite, Step7-Microwin SP2, Unity Pro XL, CX-Programmer, WPL Software, Codesys and Versa Pro. Designing software: Wonderware, CitectScada7.A, Proficy HMI SCADA/IFIX and FactotyTalk View. â - ¶ Successfully completed Spoken Tutorial program on "C", "C++" and "JAVA" Programming individually conducted by IIT-BOMBAY. â - ¶ Completed 5 days basic course for "Basic Of Mac OS" at Atharva College of Engineering. Completed Ppython Workshop conducted by CodeStrike of 1 day in '15 at Atharva College of Engineering. Automation Testâ - ¶ Operating System: Windows, Mac.

PROJECTS
Project #1
Project SWB-EBS, Support
Role Java Developer
Description
Inventory Operation System provides with a way to manage the inventories which are conducted on a day to day basis. It is used by account owners and district offices to manage their inventory cycles, plan their events, schedule their stores and people, enter employee time sheets and approve customer invoicing. In addition, it provides several tools which assist the users in completing a profitable inventory, while satisfying the needs of t
Responsibilities
Environment
â ð Accounts/Customers/Stores
â ð Cycles
â ð Planning/Scheduling/Rescheduling/Splits
â ð Time Collection
â ð Invoicing
â ð Closing the week Use of bulk updates- bulk inserts. Updates to be performed based on primary
â ð Java 1.6, Ice faces 1.8.2, Ibatis 2.0, Jboss Seam, EJB 2.0, HTML
Project #2
Project INTELLIGEN_FOR MOBILEAPP_DEV_KAUAPC
Role Java Developer
Description
Inventory Management for a retailer project is to develop Inventory Management System (IMS), accessible on Android, for retailers to track their outstanding inventory, cost of inventory, sales by day and thus empower retailer to better manage their business.
Responsibilities
â ð Cost of Inventory
â ð Inventory Management System
â ð Time Management
â ð Machine Learning Platforms
Environment â ð Java 1.6, Core Java 6.0, JSF 2.0, Rich Faces 4.1, Spring 3.2, Restful Web service using Jersey API
Project #3
Project Loan LeLo Automation
Role Software Test Engineer
Description
Loan Le Lo Offers for the selected loan from multiple banks. Customer can select particular loan offer and will have to fill the details in the form and will get registered. Email will be sent to his registered email id with login id and password.
Responsibilities
â ð Development of Page Object Model Framework for Automation Testing.
â ð Development of Automation Test Script using Selenium WebDriver & TestNG in JAVA.
â ð Execution of Selenium Test cases and Reporting defects.
â ð Debugging & Executing Automation test script using Selenium Web Driver.
â ð Involved in Functional & Regression Testing.
â ð Worked on Jenkins for Continuous Integration Requirements.
â ð Reviewed Test Reports and Prepared Summary Reports.
Environment â ð Selenium Web Driver, Java, Eclipse, TestNG, SQL
Project #4
Project DDSM Automation
Role Software Test Engineer
Description
The objective of this project is to automate a system for ZZ server. ZZ server that is Data Divider team has a manual system to enter a customer details & its user details. DDSM system have multiple roles. Each role have set of permissions.
Responsibilities
â ð Responsible for Integration Testing, Functional Testing, System Testing.
â ð Creating automation test cases for existing POM Framework using Selenium Web Driver.
â ð Enhanced Test cases using Java programming features and TestNG Annotations.
â ð Debugging & Executing Automation test script using Selenium Web Driver.
â ð Followed Data driven approach: Reading the data from Excel file
â ð Worked on Jenkins for Continuous Integration (CI) Requirements.
â ð Involved in Regression Testing, API Testing.
â ð Preparation of weekly and monthly status reports.
Automation Testi Environment â ð Selenium Web Driver, Java, Eclipse, HTML, TestNG, SQL, Postman

Platform: AWS Cloud, Azure Cloud. Services: AWS EC2, RDS, CloudFormation Template, Lambda, Dynamo DB, Cloud Watch, Auto-scaling, Elastic Bean stalk, Appdynamics. Here I manage Tibco Spotfire enterprise & Cloud Product support. Being the only Ops member in India I got a chance to recruit & build entire team of 15 members. I also worked on 4 different Projects / products simultaneously and added the hired members into these products. My responsibilities in this project include: 1. Managing Tibco Spotfire Enterprise & Cloud environment. 2. Helping India QA team with the pre-production environment for testing. 3. Coordinating production deployment & hot-fixes. 4. Leading the team and handling 4-projects 5. Arranging workshops over new AWS services for entire Team. Shell scripts for Automation: â I Wrote shell script to extract the AWS running instances and shut it down. â I Wrote shell script to extract free EIP and release those â I Wrote Lambda function to trigger important scripts. company - Synachon Technologies Limited. description - Type: Administration, automation & Monitoring. Platform: Linux/Unix, Linux-Xen Servers, Software: Puppet, Redhat Satellite server, my-sql database shell scripting. My responsibilities in this project included: 1. Managing linux media servers farms and provide application support. 2. Patching Linux physical and xen boxes. 3. Creating Satellite channels on Satellite server. 4. Automation via shell scripting and mysql DB support. 5. Troubleshooting the customized applications. company - Tsys Limited description - Type: Development, automation & Monitoring. Platform: Linux/Unix, windows Software: mysql database, shell scripting. Here my responsibility was to provide access to the users on RHDS, Cvs and dot project servers. It also included providing access to users on dev/prod VDI servers. Handling mysql database and shell scripting to automate the tasks. My responsibilities in this project included: 1. Requirements and Analysis: Understanding the requirements of the project and planning the environment and the access required. 2. Implementing mysql replication over linux servers. 3. Fine tuning the existing applications. 4. Testing & debugging the scripts for any errors. company - Patra Computer Systems Limited description - Project: CPI Type: Development, automation & Monitoring. Platform: P8 Filenet, Linux/Unix, IBM AIX Software: Sound knowledge of HTML, shell scripting. Client: Genworth Financial Duration: 2 yrs 2 months. Role: Senior System Engineer CPI is a Maintenance Project that caters to maintenance/enhancements of different applications, which are a part of Genworth Imaging Solutions. It has different applications that process the scanned Insurance documents sent from different Providers and stores the information in Oracle Database and images in P8 Filenet. It has multiple applications to generate reports to be sent to providers. Administration Support: â Providing support to the L1 engineers. â Monitoring P8 Filenet application. â Handling Tickets raised by the users. â Administration of the 10 Linux Proxy servers and mysql servers. â Implementing mysql replication. â Checking the logs of the sites visited by the users and the data downloaded. Mysql / Oracle / SQL Support: â Preparing SQL queries for the client users. â Handling Oracle database. â Testing insert, select, update queries over servers and deploying over production. â Handling the bugs raised by the users. â Implementing mysql replication over linux servers. â Taking database backup through mysql dump. Application Support: â To make sure that the customer applications like eProcess, Trexo are working fine. â To make sure all the customized filenet instances are working fine. â Writing scripts to automate few of the applications. Shell scripts for Automation: â Wrote shell script to delete the logs older than five days which was successfully deployed over Production servers. Software Proficiency: â Languages: Basics of C, SQL, PL/SQL, JAVA, JAVAAE, Javascript, HTML, CSS, jquery, mysql, Spring, Hibernate. â Software Tools: Xilinx, Modelsim, Matlab, Multisim. â Operating Systems: Windows XP, Vista, 07, 08, Ubuntu. To achieve this BBL had made an agreement with Thai Trade. Thai Trade is one of the leading e-commerce website recognized by Thai government. In present Thai Trade has a good base of users and sellers in several categories. The scope of the project is to design and develop e-commerce product features for BBLWTP project. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of electronics. Responsibilities: - o Plan and track activities involved for build and deployment. - o Resolving build issues - o Developing scripts for build, deployment, maintenance and related tasks using Jenkins. - o Collaboration with Development, QA, Product managements on build plans & schedules - o Send daily and weekly reports to the team. - o Involved in creating repositories, branches, merging activities, backup and restore activities in subversion servers. DevOps Engineer - o Maintenance of Maven, shell scripts for safe builds and deploys.

It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of product. Responsibilities: - o Detailed technical Knowledge and hands-on experience on DevOps, Automation, Build Engineering and Configura - - o Creating fully automated CI build and deployment infrastructure and processes for multiple projects. - o Developing scripts for build, deployment, maintenance and related tasks using Jenkins. - o Installing, configuring and maintaining Continuous Integration, Automation and Configuration Management tools - o Developing Ant, Maven and Shell scripts to automatically compile, package, deploy WAR, EAR and JAR files of mul- tiple applications to various platforms. - o Creating Repositories, branches, managing the permissions of users and maintaining GIT, Bitbucket - o Deploying and maintaining the code and application respectively and configuring the components which increase the re-usability. - o Working closely with Architecture, Development, Test, Security and IT Services teams. - o Supporting Business Analysts in getting used to the newly created jobs and Release activities. - o Communicating daily with On-Site Team - o Analyzing the requirements and identifying gaps & tracking logs, issues. PROJECT 2 Nendrasys Technologies Pvt Ltd., Project Name: Bangkok Bank Limited (BBL) Thairade (Commercial, E-commerce & Payment portal) company - Nendrasys Technologies Pvt Ltd description - Role: Devops Engineer ~:~:~: Devops Engineer for a team that involved different development teams and multiple simultaneous software re- leases ~:~:~: Participated in weekly release meetings with different teams to identify and mitigate potential risks associated with the releases. ~:~:~: Responsible for Creating Repositories, branches, managing the permissions of users and maintaining GIT. ~:~:~: Creating fully automated CI build and deployment infrastructure and processes for multiple projects. ~:~:~: Analyze and resolve conflicts related to merging of source code for GIT ~:~:~: Responsible for creating Ant and Maven scripts for build automation. ~:~:~: Implemented the setup for Master slave architecture to improve the Performance of Jenkins. ~:~:~: Handled end-to-end deployments and code propagation's across different environments, DEV to PROD. ~:~:~: Handled the tasks of developing and maintaining the Change Tasks. ~:~:~: Closely working with Developers, QA, Performance, UAT testers, IT Team. ~:~:~: Created and maintained documentation of build and release processes and application configuration ~:~:~: Coordinated with developers, Business Analyst and Managers to make sure that code is deployed in the Production environment. PROJECT 1 Nendrasys Technologies Pvt Ltd., Project Name: Sloan Global Holdings (Sloan) (E-commerce) company - Nendrasys Technologies Pvt Ltd description - Project Description: BBL is development of an e-commerce payment portal System. As such BBL require a system which can support multiple merchants B2B/B2C e-commerce portal with various payment options via both online and offline. To achieve this BBL had made an agreement with Thai Trade. Thai Trade is one of the leading e-commerce website recognized by Thai government. In present Thai Trade has a good base of users and sellers in several categories .The scope of the project is to design and develop e-commerce product features for BBLWTP project. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of electronics. Responsibilities: - o Plan and track activities involved for build and deployment. - o Resolving build issues - o Developing scripts for build, deployment, maintenance and related tasks using Jenkins. - o Collaboration with Development, QA, Product managements on build plans & schedules - o Send daily and weekly reports to the team. - o Involved in creating repositories, branches, merging activities, backup and restore activities in subversion servers.
	DevOps Engineer o Maintenance of Maven, shell scripts for safe builds and deploys.

Here I manage Tibco Spotfire enterprise & Cloud Product support. Being the only Ops member in India I got a chance to recruit & build entire team of 15 members. I also worked on 4 different Projects / products simultaneously and added the hired members into these products. My responsibilities in this project include: 1. Managing Tibco Spotfire Enterprise & Cloud environment. 2. Helping India QA team with the pre-production environment for testing. 3. Coordinating production deployment & hot-fixes. 4. Leading the team and handling 4-projects 5. Arranging workshops over new AWS services for entire Team. Shell scripts for Automation: â I Wrote shell script to extract the AWS running instances and shut it down. â I Wrote shell script to extract free EIP and release those. â I Wrote Lambda function to trigger important scripts. company - Synachon Technologies Limited. description - Type: Administration, automation & Monitoring. Platform: Linux/Unix, Linux-Xen Servers, Software: Puppet, Redhat Satellite server, my-sql database shell scripting. My responsibilities in this project included: 1. Managing linux media servers farms and provide application support. 2. Patching Linux physical and xen boxes. 3. Creating Satellite channels on Satellite server. 4. Automation via shell scripting and mysql DB support. 5. Troubleshooting the customized applications. company - Tsys Limited description - Type: Development, automation & Monitoring. Platform: Linux/Unix, windows Software: mysql database, shell scripting. Here my responsibility was to provide access to the users on RHDS, Cvs and dot project servers. It also included providing access to users on dev/prod VDI servers. Handling mysql database and shell scripting to automate the tasks. My responsibilities in this project included: 1. Requirements and Analysis: Understanding the requirements of the project and planning the environment and the access required. 2. Implementing mysql replication over linux servers. 3. Fine tuning the existing applications. 4. Testing & debugging the scripts for any errors. company - Patra Computer Systems Limited description - Project: CPI Type: Development, automation & Monitoring. Platform: P8 Filenet, Linux/Unix, IBM AIX Software: Sound knowledge of HTML, shell scripting. Client: Genworth Financial Duration: 2 yrs 2 months. Role: Senior System Engineer CPI is a Maintenance Project that caters to maintenance/enhancements of different applications, which are a part of Genworth Imaging Solutions. It has different applications that process the scanned Insurance documents sent from different Providers and stores the information in Oracle Database and images in P8 Filenet. It has multiple applications to generate reports to be sent to providers. Administration Support: â Providing support to the L1 engineers. â Monitoring P8 Filenet application. â Handling Tickets raised by the users. â Administration of the 10 Linux Proxy servers and mysql servers. â Implementing mysql replication. â Checking the logs of the sites visited by the users and the data downloaded. Mysql / Oracle / SQL Support: â Preparing SQL queries for the client users. â Handling Oracle database. â Testing insert, select, update queries over servers and deploying over production. â Handling the bugs raised by the users. â Implementing mysql replication over linux servers. â Taking database backup through mysql dump. Application Support: â To make sure that the customer applications like eProcess, Trexo are working fine. â To make sure all the customized filenet instances are working fine. â Writing scripts to automate few of the applications. Shell scripts for Automation: â Wrote shell script to delete the logs older than five days which was successfully deployed over Production servers.		
DevOps Engineer â Wrote shell script to delete the logs older than five days which was successfully deployed over Production servers. Software Proficiency: â Languages: Basics of C, SQL, PL/SQL, JAVA, JAVAAE, Javascript, HTML, CSS, jquery, mysql, Spring, Hibernate. â Software Tools: Xilinx, Modelsim, Matlab, Multisim. â Operating Systems: Windows XP, Vista, 07, 08, Ubuntu. It's a basically B2B project where customer can buy all fixers, sinks related product. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of product. Responsibilities: - o Detailed technical Knowledge and hands-on experience on DevOps, Automation, Build Engineering and Configuration Management. - o Creating fully automated CI build and deployment infrastructure and processes for multiple projects. - o Developing scripts for build, deployment, maintenance and related tasks using Jenkins. - o Installing, configuring and maintaining Continuous Integration, Automation and Configuration Management tools - o Developing Ant, Maven and Shell scripts to automatically compile, package, deploy WAR, EAR and JAR files of multiple applications to various platforms. - o Creating Repositories, branches, managing the permissions of users and maintaining GIT, Bitbucket - o Deploying and maintaining the code and application respectively and configuring the components which increase the re-usability. - o Working closely with Architecture, Development, Test, Security and IT Services teams. - o Supporting Business Analysts in getting used to the newly created jobs and Release activities. - o Communicating daily with On-Site Team - o Analyzing the requirements and identifying gaps & tracking logs, issues. PROJECT 2 Nendrasys Technologies Pvt Ltd., Project Name: Bangkok Bank Limited (BBL) Thairade (Commercial, E-commerce & Payment portal) Company - Nendrasys Technologies Pvt Ltd description - Role: DevOps Engineer - o DevOps Engineer for a team that involved different development teams and multiple simultaneous software releases - o Participated in weekly release meetings with different teams to identify and mitigate potential risks associated with the releases. - o Responsible for Creating Repositories, branches, managing the permissions of users and maintaining GIT. - o Creating fully automated CI build and deployment infrastructure and processes for multiple projects. - o Analyze and resolve conflicts related to merging of source code for GIT - o Responsible for creating Ant and Maven scripts for build automation. - o Implemented the setup for Master slave architecture to improve the Performance of Jenkins. - o Handled end-to-end deployments and code propagation across different environments, DEV to PROD. - o Handled the tasks of developing and maintaining the Change Tasks. - o Closely working with Developers, QA, Performance, UAT testers, IT Team. - o Created and maintained documentation of build and release processes and application configuration - o Coordinated with developers, Business Analysts and Managers to make sure that code is deployed in the Production environment. PROJECT 1 Nendrasys Technologies Pvt Ltd., Project Name: Sloan Global Holdings (Sloan) (E-commerce) Company - Nendrasys Technologies Pvt Ltd description - Project Description: BBL is development of an e-commerce payment portal System. As such BBL require a system which can support multiple merchants B2B/B2C e-commerce portal with various payment options via both online and offline. To achieve this BBL had made an agreement with Thai Trade. Thai Trade is one of the leading e-commerce website recognized by Thai government. In present Thai Trade has a good base of users and sellers in several categories. The scope of the project is to design and develop e-commerce product features for BBLWTP project. It focuses on the company, the stakeholders and applications, which allow for online sales, distribution and marketing of electronics. Responsibilities: - o Plan and track activities involved for build and deployment. - o Resolving build issues - o Developing scripts for build, deployment, maintenance and related tasks using Jenkins. - o Collaboration with Development, QA, Product managements on build plans & schedules - o Send daily and weekly reports to the team. - o Involved in creating repositories, branches, merging activities, backup and restore activities in subversion servers. DevOps Engineer - o Maintenance of Maven, shell scripts for safe builds and deploys.

Skills VISA B1-VISA (USA) Onsite Visits to Sweden & US (Seattle) Education Details January 2013 Post Graduate Diploma Information Technology Pune, Maharashtra Symbolais Institute January 2007 Bachelor of Engineering Electronics and Telecommunications Pune, Maharashtra Pune University Cloud Operations Architect (DevOps) Cloud Operations Architect (DevOps) - DevOps Skill Details Cloud Computing- Experience - 48 months Shell Scripting- Experience - 86 months Python- Experience - 6 months Automation- Experience - 72 months Solution Architect- Experience - Less than 1 year months Azure- Experience - Less than 1 year months AWS- Experience - Less than 1 year monthsCompany Details company - DevOps description - Type: DevOps Engineer. Platform: AWS Cloud, Azure Cloud. Services: AWS EC2, RDS, CloudFormation Template, Lambda, Dynamo DB, Cloud Watch, Auto-scaling, Elastic Bean stalk, AppDynamics. Here I manage Tibco Spotfire enterprise & Cloud Product support. Being the only Ops member in India I got a chance to recruit & build entire team of 15 members. I also worked on 4 different Projects / products simultaneously and added the hired members into these products. My responsibilities in this project include: 1. Managing Tibco Spotfire Enterprise & Cloud environment. 2. Helping India QA team with the pre-production environment for testing. 3. Coordinating production deployment & hot-fixes. 4. Leading the team and handling 4-projects 5. Arranging workshops over new AWS services for entire Team. Shell scripts for Automation: â I Wrote shell script to extract the AWS running instances and shut it down. â I Wrote shell script to extract free EIP and release those â I Wrote Lambda function to trigger important scripts. company - Synachon Technologies Limited. description - Type: Administration, automation & Monitoring. Platform: Linux/Unix, Linux-Xen Servers, Software: Puppet, Redhat Satellite server, my-sql database shell scripting. My responsibilities in this project included: 1. Managing linux media servers farms and provide application support. 2. Patching Linux physical and xen boxes. 3. Creating Satellite channels on Satellite server. 4. Automation via shell scripting and mysql DB support. 5. Troubleshooting the customized applications. company - Tsys Limited description - Type: Development, automation & Monitoring. Platform: Linux/Unix, windows Software: mysql database, shell scripting. Here my responsibility was to provide access to the users on RHDS, Cvs and dot project servers. It also included providing access to users on dev/prod VDI servers. Handling mysql database and shell scripting to automate the tasks. My responsibilities in this project included: 1. Requirements and Analysis: Understanding the requirements of the project and planning the environment and the access required. 2. Implementing mysql replication over linux servers. 3. Fine tuning the existing applications. 4. Testing & debugging the scripts for any errors. company - Patra Computer Systems Limited description - Project: CPI Type: Development, automation & Monitoring. Platform: P8 Filenet, Linux/Unix, IBM AIX Software: Sound knowledge of HTML, shell scripting. Client: Genworth Financial Duration: 2 yrs 2 months. Role: Senior System Engineer CPI is a Maintenance Project that caters to maintenance/enhancements of different applications, which are a part of Genworth Imaging Solutions. It has different applications that process the scanned Insurance documents sent from different Providers and stores the information in Oracle Database and images in P8 Filenet. It has multiple applications to generate reports to be sent to providers. Administration Support: â Providing support to the L1 engineers. â Monitoring P8 Filenet application. â Handling Tickets raised by the users. â Administration of the 10 Linux Proxy servers and mysql servers. â Implementing mysql replication. â Checking the logs of the sites visited by the users and the data downloaded. Mysql / Oracle / SQL Support: â Preparing SQL queries for the client users. â Handling Oracle database. â Testing insert, select, update queries over servers and deploying over production. â Handling the bugs raised by the users. â Implementing mysql replication over linux servers. â Taking database backup through mysql dump. Application Support: â To make sure that the customer applications like eProcess, Trexo are working fine. â To make sure all the customized filenet instances are working fine. â Writing scripts to automate few of the applications. Shell scripts for Automation: â Wrote shell script to delete the logs older than five days which was successfully deployed over Production servers. Software Proficiency: â Languages: Basics of C, SQL, PL/SQL, JAVA, JAVAAE, Javascript, HTML, CSS, jquery, mysql, Spring, Hibernate. â Software Tools: Xilinx, Modelsim, Matlab, Multisim. â Operating Systems: Windows XP, Vista, 07, 08, Ubuntu. Project Profile: B.E. Project FPGA Implementation of Team Size: 4. Role: Programmer. AES Algorithm AES is Advanced Encryption Standard which is used in cryptography by which we May 2016 B.E.  company - Cloudatix Network Pvt. Ltd
 description - 18.

Project Routers, Switches and Server Configuration with Group Policies
 Client Railwire/Railtel Corporation of India Ltd., Mumbai
 Type of Project Configuration of WIFI AP of Railway Station in Maharashtra State
 Role Sr. Network Engineer
 Roles & responsibilities
 A. # Earthing, trenching for equipment.
 A. # Making plans for preparing station to WIFI environment including cabling, installation, commissioning, handing over etc.
 A. # Implementing and maintaining backup schedules.
 A. # Upgrading and backups of Cisco router configuration files.
 A. # Installation, Configuration and Administration of Windows Servers 2008 R2, 2012 R2, 2016 Active Directory, FTP, DNS, DHCP, TFTP.
 A. # Troubleshooting LAN & WAN infrastructure.
 A. # Settings of the networking devices (Cisco Router, switches) co-ordinating with the system/network administrator during implementation.
 A. # Regular Health Checking of File Servers & Application Servers for Security violation, Disk Spaces etc.
 A. # Maintaining & Management, windows 7 & 10 based network.
 A. # Installing & Configuring Network Printers.
 A. # Assigning proper rights on shared drives.
 A. # User & Groups management and assigning rights according to organization requirements.
 company - Asha MMPC
 description - Project Routers, Switches and Server Configuration with Group Policies
 Client Asha MMPC, Bal. Pal, Rajasthan
 Type of Project Configuration DPMCU, Milkenet Server, EMS Server, QMS Server etc.
 Role IT Executive
 Roles & responsibilities
 A. # Implementing and maintaining backup schedules.
 A. # Upgrading and backups of Cisco router configuration files.
 A. # Installation, Configuration and Administration of Windows Servers 2008 R2, 2012 R2, 2016 Active Directory, FTP, DNS, DHCP, TFTP.
 A. # Troubleshooting LAN & WAN infrastructure.
 A. # Settings of the networking devices (Cisco Router, switches) co-ordinating with the system/network administrator during implementation.
 A. # Regular Health Checking of File Servers & Application Servers for Security violation, Disk Spaces etc.
 A. # Maintaining & Management, windows 7 & 10 based network.
 A. # Installing & Configuring Network Printers.
 A. # Assigning proper rights on shared drives.
 A. # User & Groups management and assigning rights according to organization requirements.
 company - Interface Techno System
 description - Project Routers, Switches and Server Configuration with Group Policies
 Client The Scindia School, Fort, Gwalior (MP)
 Type of Project Configuration and Implementation
 Role Network Engineer
 Roles & responsibilities
 A. # Implementing and maintaining backup schedules.
 A. # Upgrading and backups of Cisco router configuration files.
 A. # Installation, Configuration and Administration of Windows Servers 2000/2003, 2008 R2, 2012 R2, Active Directory, FTP, DNS, DHCP, TFTP, Linux OS.
 A. # Working on troubleshooting of complex LAN infrastructure.
 A. # Settings of the networking devices (Cisco Router, switches) co-ordinating with the system/Network administrator during implementation.
 A. # Regular Health Checking of File Servers & Application Servers for Security violation, Disk Spaces etc.
 A. # Maintaining & Management, windows 7 professional based network.
 A. # Installing & Configuring Network Printers.
 A. # Installing Server side Software's & Utilities.
 A. # Assigning proper rights on shared drives.
 A. # Managing user account
 company - Interface Techno System
 description - Project Network Implementation and Configuration
 Client M/s Teva API India Pvt Ltd, Bhind (MP)

 Role Network Support Engineer
 Roles & responsibilities
 A. # Implementing and maintaining backup schedules.
 A. # Upgrading and backups of Cisco router configuration files.
 A. # Installation, Configuration and Administration of Windows Servers 2000/2003, 2008 R2, 2012 R2, Active Directory, FTP, DNS, DHCP, TFTP, Linux OS.
 A. # Working on troubleshooting of complex LAN infrastructure.
 A. # Settings of the networking devices (Cisco Router, switches) co-ordinating with the system/Network administrator during implementation.
 A. # Configuration, Maintenance, check Point Endpoint Security MI Management Console for Laptop Users
 A. # Regular Health Checking of File Servers & Application Servers for Security violation, Disk Spaces etc.
 A. # Logging & Monitoring Calls using CA Unicenter Service Desk Manager.
 A. # Maintaining & Management, windows XP professional based network.
 A. # Installation, Configuration & troubleshooting of Microsoft Outlook.
 A. # Installing & Configuring Network Printers.
 A. # Installing Server side Software's & Utilities.
 A. # Assigning proper rights on shared drives.
 A. # Managing user account
 A. # Issue E-Token for laptop user
 A. # Managing more than 350 Desktops and Laptops
 A. # Taking differential and full backups of the server through Symantec Backup Exec 12D
 A. # Restoring the Files, which got corrupted or deleted accidentally.
 A. # Handling escalations of desktop calls from remote locations.
 A. # Monthly/Weekly Report Generations for the servers.
 A. # Preparing MIS, vendor & inventory management reports.
 company - Nave Bharat Press (P) Ltd.
 description - Role System Engineer
 Roles & responsibilities
 A. # Server Management
 A. # Backup management
 A. # Helpdesk, SLA monitoring and incident management
 A. # Hosting client meeting at scheduled interval
 A. # System Management and Troubleshooting
 A. # Hardware Troubleshooting

Additional Qualification & Certifications
 Network Security A. # Manual and Computerized accounting with Tally ERP9. Tally certification from Tally Academy.

Hadoop Developer - INFOSYS										
Skill Details										
Company Details										
company - INFOSYS										
description - Project Description:	The banking information had stored the data in different data ware house systems for each department but it becomes difficult for the organization to manage the data and to perform some analytics on the past data, so it is combined them into a single global repository in Hadoop for analysis.									
Responsibilities:	• Analyze the banking rates data set. • Create specification document. • Provide effort estimation. • Develop SPARK Scala, SPARK SQL Programs using Eclipse IDE on Windows/Linux environment. • Create KPI's test scenarios, test cases, test result document. • Test the Scala programs in Linux Spark Standalone mode. • setup multi cluster on AWS, deploy the Spark Scala programs • Provided solution using Hadoop ecosystem - HDFS, MapReduce, Pig, Hive, HBase, and Zookeeper. • Provided solution using large scale server-side systems with distributed processing algorithms. • Created reports for the BI team using Sqoop to export data into HDFS and Hive. • Provided solution in supporting and assisting in troubleshooting and optimization of MapReduce jobs and Pig Latin scripts. • Deep understanding of Hadoop design principles, cluster connectivity, security and the factors that affect system performance. • Worked on Importing and exporting data from different databases like Oracle, Teradata into HDFS and Hive using Sqoop, TPT and Connect Direct. • Import and export the data from RDBMS to HDFS/HBASE • Wrote script and placed it in client side so that the data moved to HDFS will be stored in temporary file and then it will start loading it in hive tables. • Developed the Sqoop scripts in order to make the interaction between Pig and MySQL Database. • Involved in developing the Hive Reports, Partitions of Hive tables. • Created and maintained technical documentation for launching HADOOP Clusters and for executing HIVE queries and PIG scripts. • Involved in running Hadoop jobs for processing millions of records of text data									
Environment: Java, Hadoop, HDFS, Map-Reduce, Pig, Hive, Sqoop, Flume, Oozie, HBase, Spark, Scala, Linux, NoSQL, Storm, Tomcat, Putty, SVN, GitHub, IBM WebSphere v8.5.										
Project #1: TELECOMMUNICATIONS										
Hadoop Developer										
Description	To identify customers who are likely to churn and 360-degree view of the customer is created from different heterogeneous data sources. The data is brought into data lake (HDFS) from different sources and analyzed using different Hadoop tools like pig and hive.									
Responsibilities:	• Installed and Configured Apache Hadoop tools like Hive, Pig, HBase and Sqoop for application development and unit testing. • Wrote MapReduce jobs to discover trends in data usage by users. • Involved in database connection using SQOOP • Involved in creating Hive tables, loading data and writing hive queries Using the HiveQL. • Involved in partitioning and joining Hive tables for Hive query optimization. • Experienced in SQL DB Migration to HDFS. • Used NoSQL(HBase) for faster performance, which maintains the data in the De-Normalized way for OLTP. • The data is collected from distributed sources into Avro models. Applied transformations and standardizations and loaded into HBase for further data processing. • Experienced in defining job flows. • Used Oozie to orchestrate the workflow. • Implemented Fair schedulers on the Job tracker to share the resources of the Cluster for the Map Reduce jobs given by the users. • Exported the analyzed data to the relational databases using HIVE for visualization and to generate reports for the BI team.									
Hadoop										
Environment: Hadoop, Hive, Linux, MapReduce, HDFS, Hive, Python, Pig, Sqoop, Cloudera, Shell Scripting, Java (JDK 1.6), Java 6, Oracle 10g, PL/SQL, SQL*PLUS										
Skill Set: Hadoop, Map Reduce, HDFS, Hive, Sqoop, java. Duration: 2016 to 2017. Role: Hadoop Developer	Rplus offers an quick, simple and powerful cloud based Solution, Demand Sense to accurately predict demand for your product in all your markets which Combines Enterprise and External Data to predict demand more accurately through Uses Social Conversation and Sentiments to derive demand and Identifies significant drivers

Company Details										
company - Tata Consultancy Services										
description - Roles and responsibility:										
Working for a American pharmaceutical company (one of the world's premier biopharmaceutical) who develops and produces medicines and vaccines for a wide range of medical disciplines, including immunology, oncology, cardiology, endocrinology, and neurology. To handle large amount of United Healthcare data big data analytics is used. Data from all possible data sources like records of all Patients (Old and New), records of medicines, Treatment Pathways & Patient Journey for Health Outcomes, Patient Finder (or Rare Disease Patient Finder), etc being gathered, stored and processed at one place.										
• Worked on cluster with specs as:										
o Cluster Architecture: Fully Distributed										
Package Used: CDH3										
o Cluster Capacity: 20 TB										
o No. of Nodes: 10 Data Nodes + 3 Masters + NFS Backup For NN										
• Developed proof of concepts for enterprise adoption of Hadoop.										
• Used SparkAPI over Cloudera Hadoop YARN to perform analytics on the Healthcare data in Cloudera distribution.										
• Responsible for cluster maintenance, adding and removing cluster nodes, cluster monitoring and trouble-shooting, manage and review data backups, and reviewing Hadoop log files.										
• Imported & exported large data sets of data into HDFS and vice-versa using sqoop.										
• Involved developing the Pig scripts and Hive Reports										
• Worked on Hive partition and bucketing concepts and created hive external and internal tables with Hive partition.										
Monitoring Hadoop scripts which take the input from HDFS and load the data into Hive.										
• Developed Spark scripts by using Scala shell commands as per the requirement and worked with both Data frames/SQL Data sets and RDD/MapReduce in Spark. Optimizing of existing algorithms in Hadoop using Spark/Context, Spark-SQL, Data Frames and RDD's.										
• Collaborated with infrastructure, network, database, application and BI to ensure data, quality and availability.										
• Developed reports using TABLAU and exported data to HDFS and Hive using Sqoop.										
• Used ORC & Parquet file formats for serialization of data, and Snappy for the compression of the data.										
Achievements										
• Appreciation for showing articulate leadership qualities in doing work with the team.										
• Completed the internal certification of TCS Certified Hadoop Developer.										
Ongoing Learning										
• Preparing and scheduled the Cloudera Certified Spark Developer CCA 175.

Description	To identify customers who are likely to churn and 360-degree view of the customer is created from different heterogeneous data sources. The data is brought into data lake (HDFS) from different sources and analyzed using different Hadoop tools like pig and hive.									
Responsibilities:	• Installed and Configured Apache Hadoop tools like Hive, Pig, HBase and Sqoop for application development and unit testing. • Wrote MapReduce jobs to discover trends in data usage by users. • Involved in database connection using SQOOP • Involved in creating Hive tables, loading data and writing hive queries Using the HiveQL. • Involved in partitioning and joining Hive tables for Hive query optimization. • Experienced in SQL DB Migration to HDFS. • Used NoSQL(HBase) for faster performance, which maintains the data in the De-Normalized way for OLTP. • The data is collected from distributed sources into Avro models. Applied transformations and standardizations and loaded into HBase for further data processing. • Experienced in defining job flows. • Used Oozie to orchestrate the workflow. • Implemented Fair schedulers on the Job tracker to share the resources of the Cluster for the Map Reduce jobs given by the users. • Exported the analyzed data to the relational databases using HIVE for visualization and to generate reports for the BI team.									
Hadoop										
Environment: Hadoop, Hive, Linux, MapReduce, HDFS, Hive, Python, Pig, Sqoop, Cloudera, Shell Scripting, Java (JDK 1.6), Java 6, Oracle Db, PL/SQL, SQL*PLUS										
Skill Set: Hadoop, Map Reduce, HDFS, Hive, Sqoop, java. Duration: 2016 to 2017. Role: Hadoop Developer	Rplus offers an quick, simple and powerful cloud based Solution, Demand Sense to accurately predict demand for your product in all your markets which Combines Enterprise and External Data to predict demand more accurately through Uses Social Conversation and Sentiments to derive demand and Identifies significant drivers

Gujarat Technological University										
Systems Engineer-Hadoop Developer										
Systems Engineer-Hadoop Developer - Tata Consultancy Services										
Skill Details										
Hadoop, Spark, Sqoop, Hive, Flume, Pig- Experience - 24 months										
Company Details										
company - Tata Consultancy Services										
description - Roles and responsibility:										
Working for a American pharmaceutical company (one of the world's premier biopharmaceutical) who develops and produces medicines and vaccines for a wide range of medical disciplines, including immunology, oncology, cardiology, endocrinology, and neurology. To handle large amount of United Healthcare data big data analytics is used. Data from all possible data sources like records of all Patients(Old and New), records of medicines, Treatment Pathways & Patient Journey for Health Outcomes, Patient Finder (or Rare Disease Patient Finder), etc being gathered, stored and processed at one place.										
• Worked on cluster with specs as:										
o Cluster Architecture: Fully Distributed										
Package Used: CDH3										
o Cluster Capacity: 20 TB										
o No. of Nodes: 10 Data Nodes + 3 Masters + NFS Backup For NN										
• Developed proof of concepts for enterprise adoption of Hadoop.										
• Used SparkAPI over Cloudera Hadoop YARN to perform analytics on the Healthcare data in Cloudera distribution.										
• Responsible for cluster maintenance, adding and removing cluster nodes, cluster monitoring and trouble-shooting, manage and review data backups, and reviewing Hadoop log files.										
• Imported & exported large data sets of data into HDFS and vice-versa using sqoop.										
• Involved developing the Pig scripts and Hive Reports										
• Worked on Hive partition and bucketing concepts and created hive external and internal tables with Hive partition.										
Monitoring Hadoop scripts which take the input from HDFS and load the data into Hive.										
• Developed Spark scripts by using Scala shell commands as per the requirement and worked with both Data frames/SQL Data sets and RDD/MapReduce in Spark. Optimizing of existing algorithms in Hadoop using Spark/Context, Spark-SQL, Data Frames and RDD's.										
• Collaborated with infrastructure, network, database, application and BI to ensure data, quality and availability.										
• Developed reports using TABLAU and exported data to HDFS and Hive using Sqoop.										
• Used ORC & Parquet file formats for serialization of data, and Snappy for the compression of the data.										
Achievements										
• Appreciation for showing articulate leadership qualities in doing work with the team.										
• Completed the internal certification of TCS Certified Hadoop Developer.										
Ongoing Learning										
• Preparing and scheduled the Cloudera Certified Spark Developer CCA 175.

Hadoop Technical Skill Set Big Data Ecosystems: Hadoop, HDFS, HBase, Map Reduce, Sqoop, Hive, Pig, Spark-Core, Flume. Other Language: Scala, Core-Java, SQL, PLSQL, Self Scripting ETL Tools: Informatica Power Center8.x,9.6, Talend 5.6 Tools: Eclipse, IntelliJ Idea. Platforms: Windows Family, Linux /UNIX, Cloudera. Databases: MySQL, Oracle.10/11g Education Details M.C.A. Pune, MAHARASHTRA, IN Pune University Hadoop Developer Hadoop Developer - PRGX India Private Limited Pune Skill Details Company Details company - PRGX India Private Limited Pune description - Team Size: 10+ Environment: Hive, Spark, Sqoop, Scala and Flume. Project Description: The bank wanted to help its customers to avail different products of the bank through analyzing their expenditure behavior. The customers spending ranges from online shopping, medical expenses in hospitals, cash transactions, and debit card usage etc. the behavior allows the bank to create an analytical report and based on which the bank used to display the product offers on the customer portal which was built using java. The portal a Role & Responsibilities: • Import data from legacy system to hadoop using Sqoop, flume. • Implement the business logic to analyses the data • Per-process data using spark. • Create hive script and loading data into hive. • Sourcing various attributes to the data processing logic to retrieve the correct results. Project 2 company - PRGX India Private Limited Pune description - company - PRGX India Private Limited Pune description - Team Size: 11+ Environment: Hadoop, HDFS, Hive, Sqoop, MySQL, Map Reduce Project Description:- The Purpose of this project is to store terabytes of information from the web application and extract meaningful information out of it the solution was based on the open source s/w hadoop. The data will be stored in hadoop file system and processed using Map/Reduce jobs. Which in turn includes getting the raw html data from the micro websites, process the html to obtain product and user information, extract various reports out of the viz Role & Responsibilities: • Move all crawl data flat files generated from various micro sites to HDFS for further processing. • Sqoop implementation for interaction with database • Write Map Reduce scripts to process the data file. • Create hive tables to store the processed data in tabular formats. • Reports creation from hive data. Project 3 company - PRGX India Private Limited Pune description - Team Size: 15+ Environment: Informatica 9.5, Oracle11g, UNIX Project Description: Pfizer Inc. is an American global pharmaceutical corporation headquartered in New York City. The main objective of the project is to build a Development Data Repository for Pfizer Inc. Because all the downstream application are like Etrack, TSP database, RTS, SADMS, GFS, GDO having their own sql request on the OLTP system directly due to which the performance of OLTP system goes slow down. For this we have created a Develo Role & Responsibilities: • To understand & analyze the requirement documents and resolve the queries. • To design Informatica mappings by using various basic transformations like Filter, Router, Source qualifier, Lookup etc and advance transformations like Aggregators, Joiner, Sorters and so on. • Perform cross Unit and Integration testing for mappings developed within the team. Reporting bugs and bug fixing. • Create workflow/batches and set the session dependencies. • Implemented Change Data Capture using mapping parameters, SCD and SK generation. • Developed MapPlet, reusable transformations to populate the data into data warehouse. • Created Sessions & Worklets using workflow Manager to load the data into the Target Database. • Involved in Unit Case Testing (UTC) • Performing Unit Testing and UAT for SCD Type1/Type2, fact load and CDC implementation. description - Roles and responsibility:										
Working for a American pharmaceutical company (one of the world's premier biopharmaceutical) who develops and produces medicines and vaccines for a wide range of medical disciplines, including immunology, oncology, cardiology, endocrinology, and neurology. To handle large amount of United Healthcare data big data analytics is used. Data from all possible data sources like records of all Patients (Old and New), records of medicines, Treatment Pathways & Patient Journey for Health Outcomes, Patient Finder (or Rare Disease Patient Finder), etc being gathered, stored and processed at one place.										
• Worked on cluster with specs as:										
o Cluster Architecture: Fully Distributed										
Package Used: CDH3										
o Cluster Capacity: 20 TB										
o No. of Nodes: 10 Data Nodes + 3 Masters + NFS Backup For NN										
• Developed proof of concepts for enterprise adoption of Hadoop.										
• Used SparkAPI over Cloudera Hadoop YARN to perform analytics on the Healthcare data in Cloudera distribution.										
• Responsible for cluster maintenance, adding and removing cluster nodes, cluster monitoring and trouble-shooting, manage and review data backups, and reviewing Hadoop log files.										
• Imported & exported large data sets of data into HDFS and vice-versa using sqoop.										
• Involved developing the Pig scripts and Hive Reports										
• Worked on Hive partition and bucketing concepts and created hive external and internal tables with Hive partition.										
Monitoring Hadoop scripts which take the input from HDFS and load the data into Hive.										
• Developed Spark scripts by using Scala shell commands as per the requirement and worked with Data frames/SQL Data sets and RDD/MapReduce in Spark. Optimizing of existing algorithms in Hadoop using Spark/Context, Spark-SQL, Data Frames and RDD's.										
• Collaborated with infrastructure, network, database, application and BI to ensure data, quality and availability.										
• Developed reports using TABL EXAU and exported data to HDFS and Hive using Sqoop.										
• Used ORC & Parquet file formats for serialization of data, and Snappy for the compression of the data.										
Achievements										
• Appreciation for showing articulate leadership qualities in doing work with the team.										
• Completed the internal certification of TCS Certified Hadoop Developer.										
Ongoing Learning										
• Preparing and scheduled the Cloudera Certified Spark Developer CCA 175.										

	Areas of expertise â Big Data Ecosystems: Hadoop-HDFS, MapReduce, Hive, Pig, Sqoop, HBase Oozie, Spark, Pyspark, HUE and having knowledge on cassandra â Programming Languages: Python, Core Java and have an idea on Scala â Databases: Oracle 10g, MySQL, Sqlserver NoSQL - HBase, Cassandra â Tools: Eclipse, Toad, FTP, Tectia, Putty, Autosys, Anaconda, Jupyter notebool and Devops - RTC, RLM. â Sc M.Tech (IT-DBS) B.Tech (CSE) SRM University Software Engineer Software Engineer - Larsen and Toubro Skill Details Company Details company - Larsen and Toubro description - Worked as a Software Engineer in Technosoft Corporation, Chennai from Aug 2015 to sep 2016. company - Current Project description - Duration: September 2016 to Till date Vendor: Cit bank Description: Citibank's (Cit) Anti-Money Laundering (AML) Transaction Monitoring (TM) program is a future state solution and a rules-based system for transaction monitoring of ICG-Markets business. Roles and Responsibilities: - â Building and providing domain knowledge for Anti Money Laundering among team members. - â The layered architecture has Data Warehouse and Workspace layers which are used by Business Analysts. - â Actively involved in designing of star-schema model involving various Dimensions and Fact tables. - â Designed SCODZ for maintaining history of the DIM data. - â Developing Hive Queries for mapping data between different layers of architecture, and it's usage in Oozie Workflows. - â Integration with Data Quality and Reconciliation Module. - â Regression and Integration testing of solution for any issues in integration with other modules and effectively testing the data flow from layer-to-layer. - â Transaction monitoring system development to generate Alerts for the suspicious and fraudulent transactions based on requirements provide by BAs. - â Developing spark jobs for various business rules. - â Learning "Machine Learning", which will be used further in the project for developing an effective model for Fraud detection for Anti Money Laundering system. - â Scheduling jobs using Autosys tool. - â Deployment and Code Management using RTC and RLM(Release Lifecycle Management) Hadoop Developer # Current Project: PRTS - RAN Environment: Hadoop 2.x, HDFS, Yarn, Hive, Sqoop, HBase, Tez, Tableau, Sqlserver, Teradata Cluster Size: 96 Node Cluster. Electronics & Communication Indore, Madhya Pradesh Medi-caps Institute of Technology & Management Hadoop developer hadoop,hive,sqoop,flume,pig,mapreduce,python,impala,spark,scala,sql,unix. Skill Details APACHE HADOOP SQOOP- Experience - 31 months Hadoop- Experience - 31 months HADOOP- Experience - 31 months Hive- Experience - 31 months SQOOP- Experience - 31 months python- Experience - Less than 1 year months hdfs- Experience - Less than 1 year months unix- Experience - Less than 1 year months impala- Experience - Less than 1 year months pig- Experience - Less than 1 year months unravel- Experience - Less than 1 year months mapreduce- Experience - Less than 1 year months dataku- Experience - Less than 1 year monthsCompany Details company - Tata Consultancy Services description - Project Description Data warehouse division has multiple products for injecting, storing, analysing and presenting data. The Data Lake program is started to provide multi-talent, secure data hub to store application's data on Hadoop platform with strong data governance, lineage, auditing and monitoring capabilities. The object of the project is to provide necessary engineering support to analytics and application teams so that they can focus on the business k Responsibility 1. Developed proactive Health Check utility for Data Lake. The utility proactively checks the smooth functioning of all Hadoop components on the cluster and sends the result to email in HTML format. The utility is being used for daily Health Checks as well as after upgrades. 2. Getting the data in different formats and processing the data in Hadoop ecosystem after filtering the data using the appropriate techniques. 3. Developed data pipeline utility to ingest data from RDBMS database to Hive external tables using Sqoop commands. The utility also offers the data quality check like row count validation. 4. Developed and automated various cluster health check, usage, capacity related reports using Unix shell scripting. 5. Optimization of hive queries in order to increase the performance and minimize the Hadoop resource utilizations. 6. Creating flume agents to process the data to Hadoop ecosystem side. 7. Performed benchmark testing on the Hive Queries and impala queries. 8. Involved in setting up the cluster and its components like edge node and HA implementation of the services: Hive Server2, Impala, and HDFS. 9. Filtering the required data from available data using different technologies like pig, regex Sende etc. 10. Dataku benchmark testing on top of impala and hive in compare to Greenplum database. 11. Moving the data from Greenplum database to Hadoop side with help of Sqoop pipeline, process the data to Hadoop side and storing the data into hive tables to do the performance testing. 12. Dealing with the Hadoop ecosystem related issues in order to provide stability to WM Hadoop ecosystem. 13. Rescheduling of job from autosys job hosting to TWS job hosting for better performance. Declaration: I hereby declare that the above mentioned information is authentic to the best of my knowledge company - Tata Consultancy Services description - Clients: 1. Barclays 2. Union bank of California (UBC) 3. Morgan Stanley (MS) KEY PROJECTS HANDLED Project Name ABSA- Reconciliations, UBC and WMDATALAKE COE company - Tata Consultancy Services description - Project Description Migration of data from RDBMS database to Hive (Hadoop ecosystem) . Hadoop platform ability with strong data governance, lineage, auditing and monitoring capabilities. The objective of this project was to speed up the data processing so that the analysis and decision making become easy. Due to RDBMS limitations to process waste amount of data at once and produce the results at the earliest, Client wanted to move the data to Hado Responsibility 1. Optimising the SQL queries for those data which were not required to move from RDBMS to any other platform. 2. Writing the Hive queries and logic to move the data from RDBMS to Hadoop ecosystem. 3. Writing the hive queries to analyse the required data as per the business requirements. 4. Optimization of hive queries in order to increase the performance and minimize the Hadoop resource utilizations. 5. Writing the sqoop commands and scripts to move the data from RDBMS to Hadoop side. company - Tata Consultancy Services description - Project Description Create recs and migrating static setup of reconciliations from 8.1 version to 9.1 version of the environment Intellimatch. Responsibility 1. Have worked on extracting business requirements, analyzing and implementing them in developing Recs 2. Worked on migrating static setup of reconciliations from 8.1 version to 9.1 version of the environment Intellimatch. 3. Done the back end work where most of the things were related to writing the sql queries and provide the data for the new recs.

	SKILL SET : Talend Big Data : Informatica Power center : Microsoft SQL Server : SQL Platform 6.2.1 Management Studio Workbench : AWS Services : Talend Administration Console : Microsoft Visual : Redshift (TAC) Studio : Athena : Data Warehouse Concept - Star : SQL : S3 Schema, Facts, Dimensions : Data Modeling - : Data Integration Microsoft Access Education Details January 2012 to January 2016 BE. Mumbai, Maharashtra University of Mumbai January 2012 CSSE Technology Kochi, Kerala St. Francis Talend ETL Developer Talend ETL Developer - Tata Consultancy Services Skill Details DATA WAREHOUSE- Experience - 23 months DATABASE- Experience - 20 months INTEGRATION- Experience - 20 months INTEGRATOR- Experience - 20 months MS SQL SERVER- Experience - 20 monthsCompany Details company - Tata Consultancy Services description - Prepared ETL mapping Documents for every mapping and Data Migration document for smooth transfer of project from development to testing environment and then to production environment. Performed Unit testing and System testing to validate data loads in the target. Troubleshoot long running jobs and fixed the issues. • Expertise in creating mappings in TALEND using Big Data supporting components such as UDBCConfiguration, UDBConnput, HDFSConfiguration, ISConfigurate, KcachoOut, CachoIn, ISqRow and standard components like FFileInputDelimited, FFileOutputDelimited, IMap, IJoin, IReplicate, IParallelize, IConvertType, IAggregate, ISortRow, IFlowMeter, ILogCatcher, RowGenerator, IJava, IJavaRow, AggregateRow, IFilter etc. • Used ETL methodologies and best practices to create Talend ETL jobs. Followed and enhanced programming and naming standards. Developed jobs, components and Joblets in Talend. Used IRunJob component to run child job from a parent job and to pass parameters from parent to child job. • Created and deployed physical objects including custom tables, custom views, stored procedures, and indexes to SQL server for Staging and Data-Warehouse environment. Involved in writing SQL Queries and used Joins to access data from MySQL. • Created and managed Source to Target mapping documents for all Facts and Dimension tables. Broad design, development and testing experience with Talend Integration Suite and knowledge in Performance Tuning of mappings. • Extensively used tMap component which does lookup & Joiner Functions. Experienced in writing expressions within tmap as per the business need. Handled insert and update Strategy using ISQLRow. • Created Implicit, local and global Context variables in the job to run Talend jobs against different environments. • Worked on Talend Administration Console (TAC) for scheduling jobs and adding users. Experienced in Building a Talend job outside of a Talend studio as well as on TAC server. • Developed mappings to load Fact and Dimension tables, SCD Type 1 and SCD Type 2 dimensions and Incremental loading and unit tested the mappings. • Developed Framework Integrated Job which schedules multiple jobs at a time and updates the last successful run time, success status, sending mail for failed jobs, maintaining the counts in SQL Database. Used IParallelize component and multi thread execution option to run subjobs in parallel which increases the performance of a job. • Created Talend jobs to copy the files from one server to another and utilized Talend FTP components. Implemented FTP operations using Talend Studio to transfer files in between network folders as well as to FTP server using components like FFileList, IS3Put, tFTPput, FFileExist, tFTPConnection etc. • Extracted data from flat files/ databases applied business logic to load them in the staging database as well as flat files. • Successfully Loaded Data into different targets from various source systems like SQL Database, DB2, Flatfiles, XML files etc into the Staging table and then to the target database. company - Tata Consultancy Services description - Experience in development and design of ETL (Extract, Transform and Loading data) methodology for supporting data transformations and processing, in a corporate wide ETL Solution using TALEND Big Data Platform. • Excellent working experience in Agile methodologies. • Proficiency in gathering and understanding the client requirements and translate business needs into technical requirements. • Design and develop end-to-end ETL process from various source systems to Staging area, from staging to Data Warehouse, soliciting and documenting business, functional and data requirements, context/variable diagrams, use cases and ETL related diagrams. • Excellent oral/written communication with ability to effectively work with onsite and remote teams. • A good team player with excellent problem solving ability and time management skills having profound insight to determine priorities, schedule work and meet critical deadlines. company - Tata Consultancy Services description - Prepared ETL mapping Documents for every mapping and Data Migration document for smooth transfer of project from development to testing environment and then to production environment. Performed Unit testing and System testing to validate data loads in the target. Troubleshoot long running jobs and fixed the issues. Role: ETL Developer Project Profile: Sun Trust Bank is a US based multinational financial services holding company, headquarters in NY that operates the Bank in New York and other financial services investments. The company is organized as a stock corporation with four divisions: investment banking, private banking, Retail banking and a shared services group that provides Financial services and support to the other divisions. The objective of the first module was to create a DR system for the bank with a central point of communication and storage for Listed, Cash securities, Loans, Bonds, Notes, Equities, Rates, Commodities, and FX asset classes. Contribution / Highlights: & & Liasing closely with Project Manager, Business Analysts, Product Architects, and Requirements Modelers (CFOC) to define Technical requirements and create project documentation. & & Development using Info 9.1, 11gOracle, UNIX & & Use Informatica PowerCenter for extraction, transformation and loading (ETL) of data in the Database. & & Created and configured Sessions in Informatica workflow Manager for loading data into Data base tables from various heterogeneous database sources like Flat Files, Oracle etc. & & Unit testing and system integration testing of the developed mappings. & & Providing production Support of the deployed code. & & Providing solutions to the business for the Production issues. & & Had one to One interaction with the client throughout the project and in daily meetings. Project #2 company - Marshall Multimedia description - JUN 2016 to DEC 2017 Client: Marshall Multimedia Environment: Informatica Power Center 9.1, Oracle 11g, unix. Role: ETL Developer Project Profile: Marshall Multimedia is a US based multimedia advertisement services based organization which has head courter in New York. EOC interface systems are advert management, Customer Management, Billing and Provisioning Systems for Consumers& Enterprise Customers. The main aim of the project was to create an enterprise data warehouse which would suffice the need of reports belonging to the following categories: Financial reports, management reports and rejection reports. The professional reports were created by Cognos and ETL work was performed by Informatica. This project is to load the advert details and magazine details coming in Relational tables into data warehouse and calculate the compensation and incentive amount monthly twice as per business rules. Contribution / Highlights: & & Developed mappings using different sources by using Informatica transformations. & & Created and configured Sessions in Informatica workflow Manager for loading data into Data Mart tables from various heterogeneous database sources like Flat Files, Oracle etc. 2 & & Unit testing and system integration testing of the developed mappings. & & Providing solutions to the business for the Production issues. Project #3 company - Assurant healthcare/Insurance Miami USA description - Assurant, USA NOV 2015 to MAY 2016 Project: ACT BI - State Datamart Client: Assurant healthcare/Insurance Miami USA Environment: Informatica Power Center 9.1, Oracle 11g, unix. Role: ETL Developer Project Profile: Assurant, Inc. is a holding company with businesses that provide a diverse set of specialty, niche-market insurance products in the property, casualty, life and health insurance sectors. The company's four operating segments are Assurant Employee Benefits, Assurant Health, Assurant Solutions and Assurant Specialty Property. The project aim at building State Datamart for enterprise solution. I am part of team which is responsible for ETL Design & development along with testing. Contribution / Highlights: & & Performed small enhancement & & Daily load monitoring & & Attend to Informatica job failures by analyzing the root cause, resolving the failure using standard documented process. & & Experience in writing SQL statements. & & Strong Problem Analysis & Resolution skills and ability to work in Multi Platform Environments & & Scheduled the Informatica jobs using Informatica scheduler & & Extensively used ETL methodology for developing and supporting data extraction, transformations and loading process, in a corporate-wide-ETL Solution using Informatica. & & Involved in creating the Unit cases and uploaded in to Quality Center for Unit Testing and UTR & & Ensure that daily support tasks are done in accordance with the defined SLA. Education Details January 2015 Bachelor of Engineering EXTC Mumbai, Maharashtra Mumbai University January 2012 Diploma Industrial Electronics Vashi, MAHARASHTRA, IN Fr. Agnel Polytechnic ETL Developer ETL Developer Skill Details Informatica- Expiience - 36 monthsCompany Details company - Blue Shield of California description - Duration: (Mar 2016 - Sept 2017) Description: Blue Shield of California (BSC) is health plan provider. The intent of this project is to process feeds coming in and going out of BSC system related to eligibility, enrollment, and claims subject areas. All these feeds comes in different formats and are processed using Informatica 9.6.1, Oracle 11g, Facets 5.0 & Tidal. Technical environment: ETL tool (Informatica power Center 9.6.1), Oracle 11g (SQL, PL-SQL), UNIX, Facets, Tidal, JIRA, PSC. Role: ETL Developer Responsibilities: & & Responsible for analyzing the business requirement document & & Involved in development of Informatica mappings using different transformations like source qualifier, expression, filter, router, joiner, union, aggregator, normalizer, sorter, lookup and its corresponding sessions and workflows. & & Extensively used Informatica Debugger to figure out the problems in mapping and involved in troubleshooting the existing bugs. & & Writing Unit Scripts & SQL's as per the business requirement. & & Impact analysis of change requests & their development. & & Data fabrication using Facets screens as well as SQL statements in membership domain. & & Unit testing & trouble shooting using Informatica debugger, SQL query & preparation of Unit Test Cases. & & Prepare documents for design, unit testing and impact analysis. Awards & Achievements & & Received Kudos Award at Syntel for contribution in error free work, commitment towards learning, client appreciation and outstanding display of Syntel values Received appreciation from Management for outstanding performance in complete tenure. & & Received iso9001 recognition for automation done in project.

Mumbai, Maharashtra University of Mumbai January 2012 CSSE Technology Kochi, Kerala St. Francis Talend ETL Developer Talend ETL Developer - Tata Consultancy Services Skill Details DATA WAREHOUSE- Experience - 23 months DATABASE- Experience - 20 months INTEGRATION- Experience - 20 months INTEGRATOR- Experience - 20 months MS SQL SERVER- Experience - 20 monthsCompany Details company - Tata Consultancy Services description - Prepared ETL mapping Documents for every mapping and Data Migration document for smooth transfer of project from development to testing environment and then to production environment. Performed Unit testing and System testing to validate data loads in the target. Troubleshoot long running jobs and fixed the issues. • Expertise in creating mappings in TALEND using Big Data supporting components such as UDBCConfiguration, UDBCCinput, HDFSConfiguration, ISConfiguration, CachoOut, CachoIn, ISqRow and standard components like FFileInputDelimited, FFileOutputDelimited, IMap, Uoin, RReplicate, PParallelize, IConvertType, IAggregate, ISortRow, FFlowMeter, ILogCatcher, RowGenerator, IJava, UAvatarow, AggregateRow, FFilter etc. • Used ETL methodologies and best practices to create Talend ETL jobs. Followed and enhanced programming and naming standards. Developed jobs, components and Joblets in Talend. Used RRunJob component to run child job from a parent job and to pass parameters from parent to child job. • Created and deployed physical objects including custom tables, custom views, stored procedures, and indexes to SQL server for Staging and Data-Warehouse environment. Involved in writing SQL Queries and used Joins to access data from MySQL. • Created and managed Source to Target mapping documents for all Facts and Dimension tables. Broad design, development and testing experience with Talend Integration Suite and knowledge in Performance Tuning of mappings. • Extensively used tMap component which does lookup & Joiner Functions. Experienced in writing expressions within tmap as per the business need. Handled insert and update Strategy using ISQLRow. • Created Implicit, local and global Context variables in the job to run Talend jobs against different environments. • Worked on Talend Administration Console (TAC) for scheduling jobs and adding users. Experienced in Building a Talend job outside of a Talend studio as well as on TAC server. • Developed mappings to load Fact and Dimension tables, SCD Type 1 and SCD Type 2 dimensions and Incremental loading and unit tested the mappings. • Developed Framework Integrated Job which schedules multiple jobs at a time and updates the last successful run time, success status, sending mail for failed jobs, maintaining the counts in SQL Database. Used PParallelize component and multi thread execution option to run subjobs in parallel which increases the performance of a job. • Created Talend jobs to copy the files from one server to another and utilized Talend FTP components. Implemented FTP operations using Talend Studio to transfer files in between network folders as well as to FTP server using components like FFileList, IS3Put, tFTPput, FFileExist, tFTPConnection etc. • Extracted data from flat files/ databases applied business logic to load them in the staging database as well as flat files. • Successfully Loaded Data into different targets from various source systems like SQL Database, DB2, Flatfiles, XML files etc into the Staging table and then to the target database. company - Tata Consultancy Services description - Experience in development and design of ETL (Extract, Transform and Loading data) methodology for supporting data transformations and processing, in a corporate wide ETL Solution using TALEND Big Data Platform. • Excellent working experience in Agile methodologies. • Proficiency in gathering and understanding the client requirements and translate business needs into technical requirements. • Design and develop end-to-end ETL process from various source systems to Staging area, from staging to Data Warehouse, soliciting and documenting business, functional and data requirements, context/variable diagrams, use cases and ETL related diagrams. • Excellent oral/written communication with ability to effectively work with onsite and remote teams. • A good team player with excellent problem solving ability and time management skills having profound insight to determine priorities, schedule work and meet critical deadlines. company - Tata Consultancy Services description - Prepared ETL mapping Documents for every mapping and Data Migration document for smooth transfer of project from development to testing environment and then to production environment. Performed Unit testing and System testing to validate data loads in the target. Troubleshoot long running jobs and fixed the issues. Computer skills - Yes. SQL knowledge-yes Unix knowledge-yes Data warehouse knowledge-yes Ab into -yee MY HOBBIES - : • Playing Cricket, football. • Reading books • Visiting new places/Travelling. DECLARATION- I hereby declare that the above mentioned information is factual and correct up to the best of my knowledge and belief. Date - 27.01.2019 MR. MANISH PRABHAKAR PATIL, Place:- MUMBAI Education Detail June 2014 to June 2015 Bachelor's Electronics and Telecommunication A C Patil college of Engineering January 2009 to January 2011 Engineering Navi Mumbai, Maharashtra Bharati vidyapeeth January 2008 H.S.C. Mumbai, Maharashtra Khelaa college ETL Informatica Developer
ETL Developer	ETL DEVELOPER Skill Details ETL- Experience - Less than 1 year months Data Warehouse- Experience - Less than 1 year months Datastage- Experience - Less than 1 year monthsCompany Details company - Reliance Infocom description - I have been working as ETL Developer in reliance industries in India for the past 3years.I have very good knowledge of Informatica and SQL as well as good knowledge of Unix.I am willing to work in yours company as Developer. Technical Summary : • Knowledge of Informatica Power Center (ver. 9.1 and 10) ETL Tool: Mapping designing, usage of multiple transformations. Integration of various data source like SQL Server tables, Flat Files, etc. into target data warehouse. • SQL/PLSQL working knowledge on Microsoft SQL server 2010. • Unix Work Description: shell scripting, error debugging. • Job scheduling using Autosys, Incident management and January 2010 to January 2014 BTech CSE Sangli, Maharashtra Walchand College of Engineering October 2009 H.S.C. Sangli, Maharashtra Willington College August 2007 S.S.C Achievements Sangli, Maharashtra Martin's English School ETL Developer
ETL Developer	IT Analyst Skill Details ETL- Experience - 48 months EXTRACT, TRANSFORM AND LOAD- Experience - 48 months INFORMATICA- Experience - 48 months MS SQL SERVER- Experience - 48 months RECONCILIATION- Experience - 48 months Jira- Experience - 36 monthsCompany Details company - Tata Consultancy Services description - Project Details Client/Project: Barclays UK London/HEXAD Environment: Informatica (Power Center), SQL Server, UNIX, Autosys, Intellimatch. Project Description: The objective is to implement a strategic technical solution to support the governance and monitoring of break standards - including enhancements to audit capabilities. As a part of this program, the required remediation of source system data feeds involves consolidation of data into standardized feeds. These remediated data feeds will be consumed by ETL layer. The reconciliation tool is designed to source data from an ETL layer. The data from the Front and Back office systems, together with static data must therefore be delivered to ETL. Here it will be pre-processed and delivered to reconciliation tool before the reconciliation process can be performed. Role and Responsibilities: • Responsible for analyzing, designing and developing ETL strategies and processes, writing ETL specifications • Requirement gathering • Making functional documents and low level documents • Developing and debugging the Informatica mappings to resolve bugs, and identify the causes of failures • User interaction to identify the issues with the data loaded through the application • Developed mappings using different transformations company - Tata Consultancy Services description - Project Details Client/Project: Barclays UK London/HEXAD Environment: Informatica (Power Center), SQL Server, UNIX, Autosys, Intellimatch. Project Description: The objective is to implement a strategic technical solution to support the governance and monitoring of break standards - including enhancements to audit capabilities.
